Présentation of Tractel®

Tractel is a world leading safety specialist providing reliable, innovative and cost-effective working-at-height solutions and services. These solutions are used in many end-user applications, in particular in industrial, construction, energy, telecoms and infrastructure projects.

Tractel solutions portfolio comprises of:

- **Height Safety** - Leading provider of working-at-height personal protective equipment – fall arrest devices (Stopfor™, Blocfor™, Derope™), anchors, harnesses - as well as collective protective equipment, such as guardrails, (Bluewater™), safety gates (Fabenco™) and safety nets (Knot®).
- **Load Measurement & Control** - European leader in industrial load measurement and control – Dynafor™, Handifor™, Dynasafe™, Dynaline, Dynarope, and Dynaplug.
- **Lifting & Handling** - World leader in pass-through manual wire rope hoists (Tirfor®) and pass-through electrical wire rope hoists (Tirak™, Minifor™), clamps, pulleys and hooks, as well as ground handling equipment.
- **Temporary & Permanent Access** - World leader in hoists (Tirak®) and aluminium platforms (Alta, Skysafe™), mast climbing work and transport platforms and construction elevators (Scanclimber®), Building maintenance units and permanent access solutions for industry, infrastructure and buildings.
- **Services** - In-situ inspection and maintenance services for permanent access equipment, workshop maintenance and general overhauls of mechanical equipment, as well as training and rental services.

Established more than 80 years ago, **Tractel** today has significant manufacturing facilities in Europe (France, Germany, Poland, Spain), the USA (Minneapolis, Houston), Canada (Toronto, Montreal), China (Shanghai), Singapore and Turkey. These facilities are supported by dedicated centres of excellence in R&D, engineering and safety standards

Tractel has customers in 120 countries, subsidiaries in 19 countries, 10 000 distributors around the world, and employs around 1 100 people.

This network of expertise, experience and geographical locations allows **Tractel** to achieve global reach with local presence.

SALES ORGANISATION

All our products are meant for professional use only.

Minimum value per order € 100 Net. Our supplies are manufactured according to the terms shown on our order acknowledgment, a copy of which is available on request. We reserve the right to modify, without prior notice, the characteristics, the equipment, the prices and Sales Conditions of our products. Our delivery time will be indicated on our order acknowledgment.

Traceability platform

Instant access to key product information

Introducing **Tractel**®'s new product information and traceability platform – an exciting new tool giving you instant access to a range of technical information related to your product.

Simply use a QR code reader to scan the identification label on the product or packaging to gain access to the information you need; direct to your phone, tablet or computer.

Packaging product label
(on packaging)

Product label
(on product)

EAN Code label
(on packaging)

Instant access to:

- **Product Identification information** (batch & serial number, manufacturing date etc).
- **Product Data** (available to download to your device):
 - Certificate of Conformity (Notified body product certificate)
 - User manual
 - Technical data sheet
 - Declaration of conformity
- **Traceability system**
 - TRACTEL® service information : summary of service performed by TRACTEL®
 - Possibility to register & trace the key life events of the equipment: date of the first use, attribution of the equipment to a user, periodic inspection, maintenance operation, disposal, etc...

Traceability platform

How to use it ?

1

Download a free QR code scanner on your smartphone, tablet or computer.

Example :
QR Code Reader for Android

2

Open the QR Code Scanner app and scan the code on the packaging or product.

You will be redirected to a special Tractel® website with a webpage dedicated to your product.

3

Find all the relevant information of the product you scanned.

Available downloads in PDF format:

- Identification information of the product: batch & serial number, manufacturing date.
- Certificate of Conformity (Notified body product certificate)
- User manual
- Technical data sheet
- Declaration of conformity

4

Register to have immediate access to advanced functionalities.

- Details to create an account:
 - Name
 - E-mail address
- Create a password to secure your account.

5

Enter and track the key life information of your product.

- Date of the first use
- Attribution of the equipment to a user
- Periodic inspection
- Maintenance Operation
- Disposal

Lifting and handling

General safety recommendations

For lifting and load handling

For every use of lifting gear, it is mandatory to respect the safety instructions.

The rules outlined below refer to the right safety approach but don't replace the user manual's instructions of each lifting product.

The lifting operations must be carried out by trained operators.

Tractel® lifting gear provide optimum safety if handled properly.

What to do

- Verify the working load limit of your lifting gear, lifting accessories, different anchoring solutions and supporting structure.
- Verify that the lifting gear is in perfect condition and foreseen of a readable product label.
- Check the load lifting chain on possible damage
- Ensure the right load suspension and its accessories
- Carry out the periodical product inspections.
- Respect recommendations for stocking properly your gear.

What you should not do

- Starting the lifting operation while the load is not fixed properly or when persons are located in the working area.
- Balancing the load during lifting operations.
- Lifting/lowering the load without verification of the lifting speed.
- Have the load suspended during long extended periods.
- Move under loads.
- Drop lifting gear : hoists and winches should always be placed correctly on the floor.
- Modify one or more components of your lifting gear.

Advise - Audits - Assistance

Manage the safety and reliability of your lifting gear as well its compliance with legal requirements.

Legal and regulatory framework :

Because the best way to limit the risk is to anticipate it ...

Load lifting equipment can generate serious risks for everybody's safety.

Tractel® service approach

Tractel® accompagnies you with the safety management of your working environment.

Periodical inspections are aimed to maintain your lifting gear in good condition and are not intended to verify the compliance with the design rules. Therefore, the periodic inspection reports are not the reflection of the evaluation of the conformity with the regulation.

Approach Tractel® :

- Presentation of services by Tractel®
- Inventory review of the lifting gear
- Visit of the technical workshop
- Audit of the lifting gear and its working environment
- Verification and analysis of the safety logbook and the last audits of third party inspection agencies
- Proposal of actions to be carried out

In order to enable Tractel® to proceed at best to this audit, the auditee shall provide the following elements:

- List of the lifting gear
- Competent staff for the operation of the lifting gear
- The following documents: logbook, service records, user manuals, last audit reports from third party inspection agencies

Tirfor®

Tirfor: Proven quality for decades, brand name and market leader – often copied never equalled

The Tirfor principle

- Two jaws alternatively pull the wire rope and the load in the required direction, like pulling a rope hand over hand.
- The jaws are self-gripping providing safe operation.
- The heavier the load, the tighter the jaws will grip.
- By operating the unlocking mechanism, the wire rope can be inserted or removed from between the jaws.

Multifunctional

- Work can be carried out in any direction: horizontally, vertically or at an angle.
- No theoretical limit to the wire rope length.
- Manually operated for use almost anywhere.
- Motorised versions available.

Safe and reliable

- Constant control over loads during lifting and lowering with millimetre accuracy.
- When the hoist stops, the load will be automatically distributed over the two jaws.
- Overload protection.

Increasing the WLL

- The Tirfor's WLL can be increased by a factor of 2, 3, 4 or more by using sheave blocks.
- When calculating the WLL for sheaved systems, allow for a WLL loss of 4% per sheave block, caused by friction.

Tirfor TU

TU 8

TU 16

TU 32

The Tirfor TU series is developed for daily heavy-duty applications under the most extreme circumstances.

The Tirfor TU hoist is a versatile and portable multi-purpose manual hoist for lifting, pulling and positioning. It can be used for lifting and pulling, but also for lowering, tensioning and securing loads in all directions.

One-man operation by using the telescopic control lever supplied as standard. Spare shear pins for overload protection are supplied as standard.

Proven quality for decades, brand name and market leader – often copied never equaled!

TU range fully compliant with EN13157.

Tracinfo is our product information and documentation platform that gives you access to the documents you require wherever you are. Simply use a QR code reader to scan the identification label on the product or packaging to access a micro website specific to the product where you can download documents such as the User Manual or the Declaration of Conformity - direct to your phone, tablet or computer.

New – you can now also register the details of periodic inspections and maintenance work in Tracinfo and get automatic reminders when the next inspection is due.

Tirfor T500

- Lightweight and easily portable
- Delivering safe and assured operation in any direction, either in a straight line or using diverter pulleys over an unlimited length
- Low-wear clamping jaws during demanding applications increasing the life of the wire rope
- Overload protection for safe and secure operation
- Fast and easy to install and use
- Working load can be increased by using sheave blocks
- Positioning loads with millimetre accuracy
- Secure release system
- Load capacity from 800 - 3200 kg
- Full range of accessories are available – sheave blocks, diverter pulleys, ground anchors and reels

Pulleys EH series

Selection of sheaves diameters for wire rope by application: According to FEM Standard:

Lifting :

The sheaving factor K will be minimum 12 (for motorised winch class M1) up to 28 (for motorised winch class M8).

N.B.

Sheaving factor is applied on wire rope diameters. The results correspond to the outside diameters of the sheave.

Example:

Wire rope diameters = 10 mm used with winch class M1

Outer sheave diameter = 10 mm x 12 = 120 mm

Diameter of groove base = 120 mm - 10 mm (wire rope) = 110 mm

Manual drum winch

Wire rope included

New generation compact winch using aluminium and composite materials offering excellent corrosion resistance.

- Low effort on the crank handle and enclosed planetary gear housing.
- The drum has a patented failsafe wind direction and can be disengaged when not under any load
- Galvanized fixing plate for standard model or stainless steel for stainless steel model
- Automatic brake system
- Stainless steel ratchet pawls and springs
- Removable crank handle with comfortable and ergonomic grip
- Flexible wire rope exit of more than 250°
- Operating temperature from -10°C to +50°C

Carol

Manual drum winch

The CaRol manual winches are for installation in permanent locations for lifting or pulling materials.

- WLL up to 3000kg
- Option to release the drum in unloaded position
- Full capacity on all layers of wire rope
- Automatic brake
- Adjustable crank
- Variable anti spin wire rope length depending on load capacity
- CaRol anti spin wire rope winches are available in different versions
- Winch with spur gearing
- Winch with worm gearing
- The anti spin wire rope is wound onto the drum by turning the crank

Electric winch

Electric winch designed for simple lifting and pulling applications, ideal to replace a manual winch.

- Direct order (use protected from bad weather)
- Mechanical parts machined and protected by cathoresis
- Drum in mechanically welded steel
- Grease bath gearbox with helical gears
- Reduction system fully protected by a metal or plastic cover, ensuring perfect safety
- Single-phase 230 V single-phase brake motor with 50 Hz permanent capacitor, lifting type
- Class F. Protection IP 44 (150 kg model) and IP 54 (300 and 500 kg models)
- Up/down control box with emergency stop (2 m control cable)
- Limit switch as standard
- Motor power adapted to any installation.

Carol TE

Electric winch

Electric winches designed for lifting and single pulling applications, with high quality requirements:

- Pendant control box UP/DOWN and E-stop with 3M pendant control cable
- Electromagnetic motor brake 230V - permanent condensator 50 Hz lifting type, P = 0,75 or 1,1 kW according to the model
- Class F - Protection IP 54
- Reducer sealed in oil bath with helical gears
- Welded steel drum with large flanges enabling a reliable outlet of the rope
- Working load limit for 1st drum layer

Safety:

- UPPER limit switches
- Low voltage control box protecting the operator against electric risk

Altotir

Hoist for construction sites

Wire rope included

Altotir hoists are motorised hoists with a steel cable drum. They allow loads to be lifted. The hoist is installed on a swing jib, which in turn is installed on a scaffold tube. The device is operated by a button pendant control box with emergency stop.

Hoist for lifting loads; quick installation on scaffold tube.

- Model capacity 200kg
- Height of Lift 25m
- Speed 25m /min
- Robust device
- Installation on a standard scaffold tube or installation on a hinged slewing jib.
- Precise load positioning within millimetres

Model	WLL	Lifting Height (m)	Wire Rope Diameter (mm)	Product Code

Minifor - High performance portable electric hoists

A comprehensive range of universal, high performance portable electric hoists, for work at any height.

A Unique Concept

The Minifor hoist is very compact, light-weight and easy to handle. Unlimited wire rope length and therefore unlimited lifting height. Available in various models. This hoist is not only suitable for lifting loads, but also for pulling loads in any direction.

Operated by a control pendant (2.5m cable, Up/Down/Emergency Stop), which is supplied as standard. Power supply cable length 1 metre, with CEE Form connector.

The Minifor can be optionally be equipped with a robust radio remote control with functions Up/Down and E stop with a standard range of 70 m - 433 Mhz.

Integrated drum reelers are available for wire rope lengths 20m, 27 and 40m dependent on capacity of the minifor™.

Minifor TR range

Minifor offers a compact portable motorized solution for lifting, pulling as well as positioning loads

- Unlimited wire rope length and therefore unlimited lifting height
- Compact, manageable and low self-weight.
- Unique lifting capacity/self-weight ratio.
- Handle for easy carrying
- Power supply 230 VAC or 400 VAC. Can be used in any working environment.
- Wire rope or kernmantle rope version.
- Quick and easy installation and includes a swivel eye hook
- In conformity with Machinery Directive 98/37/EC and the European EN 292 standard.
- WLL can be increased to a maximum of 950kg using an
- Unique lifting capacity/self-weight ratio
- Unlimited wire rope length
- Reliable and easy to use
- Working load can be increased by using optional sheaving kit
- Up and down limit switches
- Optional reelers
- Optional remote control
- Strong, robust and versatile (IP55)

Minifor TR125 SY

The Minifor TR125 SY hoist is equipped with a special synthetic rope. It can be used to lift over great heights (standard rope length up to 200 m, longer ropes upon request). The torque is steady and speed is also stable at 30 m/min. The motor integrated brake makes it intrinsically safe in operation. The Minifor TR125 SY hoist is available with different voltages and is suitable for various applications. It is operated through a push button pendant control. As an option, the Minifor TR125 SY hoist can be equipped with a wireless remote control.

TECHNICAL CHARACTERISTICS :

- Special synthetic rope
- Lightweight
- Quick installation
- Unlimited wire rope length
- Easy to use, light-weight, robust, powerful
- Working load can be increased with sheaving kit
- Up and down limit switches
- Strong, robust and versatile (IP55)

Tirak range

Traction hoists with limitless pulling length for man riding and material lifting

- Capacity from 300 to 3000 kg
- Compact
- Always profitable
- Diversity of applications
- Robust components
- Low-wear components
- Easy handling

The compact dimensions and low weight enable easy handling and simplify the integration of the tirak™ hoist into your own applications, thus increasing productivity and efficiency. An Increase of load capacity is possible by using reeving pulleys.

Tirak range

tirak™ X series - electric traction wire rope hoist for lifting and pulling

- Unlimited length of lift and pull as the wire rope is not reeled on a drum
- Secondary centrifugal brake for controlled descent in case of power failure
- Pendant control box UP/DOWN with E-stop and 3 m pendant control cable
- Constant speed
- Constant lifting and pulling capacity
- Integrated mechanical overload protection > 980 kg
- Long service life
- Customized assembly and production
- Spare parts available
- Various smart accessories

tirak™ : T Range - universal electric traction wire rope hoist

- Traction wire rope hoist capable of pulling in both directions with the same force
- Unlimited length of lift and pull as the wire rope is not reeled on a drum
- Secondary centrifugal brake for controlled descent in case of power failure
- 48V pendant control box UP/DOWN and E-stop with 3 m pendant control cable
- W.L.L. 980 kg

tirak™ XA series : air-driven traction wire rope hoists

- Unlimited length of lift and pull as the wire rope is not reeled on a drum
- Secondary centrifugal brake for controlled descent in case of air power failure
- W.L.L. : 300 to 980 kg

tirak™ X series with supporting frame and reeler system

- Availability of different wire rope reelers from 50 to 800 m rope length capacity
- Pendant control box UP/DOWN and E-Stop with 3 m pendant control cable
- W.L.L. : 300 to 3000 kg material handling

The Sodenic is a complete jib crane with integrated wire rope hoist. Perfect for lifting materials up to and down from a roof. Sodenic is made of modular galvanized construction which makes it easy to transport and assemble without specialized tools. Due to the compact nature of the knocked down crane it can easily fit into a lift and be manipulated and assembled by two people.

- Galvanized steel construction
- Electric motor FEM class: 1Am/M3
- Petrol engine noise emission: 2000/14/CE
- Duty cycle: 100%
- Safety factor: 4
- Wire rope with swivel safety hook
- Sheave blocks with self-lubricating bearings
- Counterweight 750 kg (30 blocks of 25 kg each)
- Limit switches
- Topping and rotating jib
- Locking pins with safety pin
- Modular configuration
- Fits in elevator, once disassembled
- One-man operation

CHARLET pulleys, blocks & sheaves

CHARLET blocks

- Tractel blocks, also known as CHARLET, have been developed for all possible applications and are suitable for the most extreme ambient conditions.
- The various models are suitable for wire ropes or ropes and can be used for reeving loads. They can be used for pulling, lifting and diverting the wire rope.
- It is important to choose the right block. This choice depends on the type of application, manual or motorized drive and the rope diameter.
- We can design, produce, test and supply all possible cable blocks, crane blocks, rotablocks, hooks and sheaves (WLL 1 to 500t).
- Through customization and in-house production short delivery times can be realized.
- We are happy to help you make the right choice.

CHARLET pulleys

- There is a wide variety of basic versions available. Even models for man-riding applications in conformity with EN 1808 are available from stock.

Detail of sheave

Example of application

Winding ratio	Reduction
6	21%
8	17%
10	14%
15	11%
20	9%

Angle	Suspension load
0°	Hoist WLL x 2
15°	Hoist WLL x 1,98
30°	Hoist WLL x 1,95
45°	Hoist WLL x 1,85
60°	Hoist WLL x 1,73
90°	Hoist WLL x 1,41
120°	Hoist WLL x 1
150°	Hoist WLL x 0,52
180°	0

CHARLET special designs

Tractel Solutions offers a wide range of custom made sheaves
Pitch diameter (\varnothing_{dp}) = Wire rope \varnothing x R

Pulleys, Blocks and Sheaves

BX – Sheave Axle

- Allows mounting of BG-BH-BN sheaves

Model	Ø	Product Code
B060X	15	105439
B061X	22	105449
B062X	30	105459
B063X	30	105469
B064X	52	105479

Palanmatic

- Manual hoist with nylon rope Ø 4 mm
- Lifting on a fixed or mobile point (hoist in vertical position),
- Lifting of the towing gear (hoist in horizontal position).

Model	Description	Lifting Height (m)	WLL	Number of Sheaves	Weight (kg)	Product Code
D202A	Scissor eye hook / swivel eye hook*. 3 sheaves.	7	250	3	1.9	80009
D212A	Scissor eye hooks. 3 sheaves.	3	250	3	1.6	80039
D204A	Scissor hook / swivel eye hook*. 5 sheaves.	7	400	5	2.9	80019
D214A	Scissor eye hooks. 5 sheaves.	3	400	5	2.2	80049
D206A	Scissor eye hook / swivel eye hook*. 7 sheaves.	3	630	7	3.7	80029

DB Poulistop 2

- Efficient and light
- Rope locking system
- Corrosion resistant product
- Can be attached to scaffolding
- Safe and easy to use

Model	Sheave Diameter (mm)	Description	Wire Rope Diameter (mm)	WLL	Weight (kg)	Product Code
D050B	150/195	Poulistop 2 with hook	18-20	50	4	192319
D051B	150/195	Poulistop 2 with scaffold bracket	18-20	50	4	192329

Pulleys, Blocks and Sheaves

ELS = with safety hook

ELC = with safety clasp

ELC - ELS pulleys

New light & compact 1t pulley for use in Offshore applications or along with Minifor.

The pulley is designed to be as compact as possible for use in elevator cage ceiling, to install the elevator motor.

It is designed with the same principles than an ET pulley, in order to be robust, corrosion resistant (Zn coating) and with all elements being foolproof.

It exists in two version, ELC (as shown below) and ELS with safety hook (but less compact).

Model	Description	Sheave Diameter (mm)	Wire Rope Diameter (mm)	WLL	Weight (kg)	Product Code
ELC1-70E7	equipped with safety clasp	55	6.5/7	1,000	1.6	252209
ELS1-70E7	equipped with safety hook	55	6.5/7	1,000	1.8	252259

Pulleys

EP Blocks for Man-Riding Applications

Security:

- Pulleys conform to FEM87 and EN 1808 standard
- Finger protection system
- End stop

Ease of use:

- The special geometry of the "chicane" stop, developed by Tractel, allows quick and easy insertion of the cable without tools.

Lightweight:

- The lightweight flanges and the polyamide sheave make it light and easy to install.

Versatility:

- EP sheaves can be used for lifting material as well as people with the same maximum working load.

Compatibility:

- EP pulleys are compatible with our tirfor® and tirak™ hoist ranges.

Corso

Beam clamps for material handling

Corso beam clamps for material handling

The Corso beam clamp range can be quickly and easily assembled onto a steel beam, creating a reliable anchor point for lifting equipment such as Tirfor, Bravo, Tralift, Minifor and Tralift TT.

- WLL from 1t to 10t
- For beam widths from 75 - 320 mm depending on capacity
- Easy width adjustment to the size of the steel beam
- Generously sized body made of steel alloy
- High stability when fixed correctly
- Spindle bar is locked from rotating by tightening a grub screw

Tralift - Manual chain hoists

The Tralift manual hand chain hoist has a unique Tractel design which is compact, light yet robust, able to tackle the most extreme lifting conditions.

Ideal for rental fleets, industrial and construction application. Tractel also offer Tralift in black format for the entertainment industry.

Certified by TÜV Rheinland to EN13157 for capacities 500kg and above when fitted with Corolim Grade 8 EN818-7 load chain which also offers excellent corrosion protection.

- Corrosion resistant Corolim® load chain with less wear and longer life – EN818-7 compliant
- EN13157 fully compliant TÜV Rheinland certified
- Compact and lightweight
- Robust design with cast steel safety catches
- Easily portable for use anywhere
- Swivel hook with overload indication and robust cast steel safety catches
- Option: Overload protection for safe and secure operation reducing unnecessary damage to the hoist – 0.5t to 20t

Tralift dimensions and key components

1. Load chain
2. Lifting hook
3. Pulley block
4. Low limit stop
5. Suspension hook
6. Safety catch
7. Hand chain

Bravo lever hoist aluminium version

Bravo AC aluminium lever hoists

The Bravo AC series lever hoist with aluminium casings is lightweight and easily carried in its own bag, complete with belt loop.

- Aluminium casings
- Compact and lightweight
- Robust design equals less down time
- Easily portable for use anywhere
- Swivel hook
- Pull-through feature to quickly adjust the load chain
- Carry bag with belt loop
- Option: chain locking and shortening device for greater safety ensuring the load or tension is never lost

Bravo without load limiter

Machine Directive 2006/42/CE EN13157 - A1:2009 conformity

bravo™ lever hoists from Tractel® are particularly suitable for tensioning, lifting, handling and traction operations, with optimum safety thanks to exclusive desynchronised pawls preventing any unintentional release of the load.

- Permanent load control
- Automatic load brake closure
- Optimised safety against unintentional release of the load thanks to the two independent desynchronised pawls
- Free wheel system / neutral position: fast and easy pull through of the load chain
- Wide range: capacities from 250 kg to 9 t
- Roller and block chain guides ensuring a smooth chain action through the hoist
- Galvanised fittings, epoxy paint for much greater resistance to aggressive environments
- Forged steel hooks with 360° rotation and overload opening indicators
- Compact with a light weight simplifies use and transport
- Rubber handle improves grip

Chain Locking Device - CLD

The CLD chain locking device acts as an adjustable limit on the Bravo & Tralift lever hoist when lowering the load.

The chain locking device can be used with Bravo lever hoists for load lifting, load pulling and rope tensioning applications.

The chain locking device is intended to be a retrofitted accessory to adapt all models and capacities of Bravo & Tralift hoists supplied by Tractel in compliance with the size of the chain.

The CLD acts as a chain end stop, which can be adjusted to any position on the free side of the load chain.

Modèle	CMU du palan associé (kg)
250 kg and 500 kg	196438
750 kg and 1 ton	196448
1.5 ton	196458
3.6 ton and 9 ton	196468

Possibility of mounting the CLDs on the hoists in the factory.

Range of Electric Chain Hoists

volt trac™

- **WLL ranging from 125 to 2000 kg**
- Warranty 18 months
- Designed for frequent use
- Fit for challenging environments: IP 55
- Extra low noise level
- Galvanized load lifting chain

tralift™ TT

- **WLL ranging from 250 to 2000 kg**
- Warranty 3 years
- Designed for frequent use
- Fit for challenging environments : IP 65
- Low noise level: 65dB
- Stainless steel models available
- Special high performance load lifting chain
- Low headroom

Tralift TT

Range of electric chain hoists - 250 to 6 300 kg.

Designed for permanent installation on a jib crane, underneath an overhead crane, or on motorised or non-motorised trolleys.

- Suitable for the toughest applications and conditions
- Recommended for dusty and humid environments and also for outdoor use
- Extra long service life thanks to the permanently lubricated gearbox and the profiled steel
- chain with manganese phosphate coating
- Application range: -15 to +50°C
- Low weight and overhead height due to the compact housing
- Reinforced load hook with forged safety catch
- Alternating current (230V / 1Ph / 50Hz) or three-phase current (400V / 3Ph / 50Hz)
- Ergonomic remote control, wired or wireless
- Corrosion resistant finish

Tralift TT

Range of electric chain hoists from 250 to 6 300 kg.

Tralift TT ATEX

To be used in EX proof site (ATEX).

Tralift TT - special models

tralift™ TTHK

Handy chain model for fast and easy handling of loads

- Control of electric chain hoist and guidance of the load with one hand
- Control unit with rocker switch for left- and right-handed operation
- Hook end positions adjustable by geared limit switch
- Can be combined with slewing or suspended cranes

Option: handy kit for retrofitting of standard electric chain hoist

Option: with frequency inverter

tralift™ TTS

Synchronized electric chain hoists for handling of large and bulky loads:

- Precise parallel run of two hooks without twisting the load
- With temperature monitoring
- Hook position individually adjustable by geared limit switch
- Distance between load hooks 0.7-5.0 m
- Perfect to combine with suspended crane or travelling crane

Option: with trolleys

Option: with frequency inverter

tralift™ TTW

Electric chain hoist for wind turbines:

- Lifting speed up to 16 m/min
- Lifting height up to 200 m
- Temperature monitoring with shutdown function of the motor in case of overheating
- Automatic switching from high to low lifting speed shortly before the stroke end by geared limit switch
- External limit switches for hook end positions
- Tempered special chain
- Load hook with protective cover

Option: with manual or motorised trolley

Option: chain container

Power Line Systems

Flat cable conductor systems

- Galvanized track rail length 2 m, with connectors
- Rail brackets to be clamped
- Cable trolleys, tow trolley
- Cable-fixed end stops
- Terminal box
- Flat cable with cable glands

Bus bar conductor system

- PVC section element
- Terminal box
- Covering flange
- Collector trolley with leading arm
- End cap
- Fixing brackets

Tralift TR

Pneumatic chain hoist

- Adjustable lifting speed
- End limit switch
- Compact
- Low headroom
- Disc brake
- Operated pressure: 6,3 bars
- Noise level less than 83 dBA to 1 m

Standard:

- 3 m lift - 2 m control cable
 - Control by pendant rope or pendant box with button and emergency
 - Galvanised lifting chain according to DIN 818-7
 - Overload integrated device 1 fall
 - Complete range up to W.L.L. 75 t
 - Chain box
 - To be used un EX proof site (ATEX). For other zones : confirm classification
-
- Pneumatic traversing trolley : on request

TOPAL

TOPAL RANGE

Tractel offers a complete range of lifting accessories (clamps, beams, etc.) to facilitate safe lifting and movement of materials.

STANDARD PRODUCTS

All standard products exceed the highest safety requirements and are designed from a user's point of view: versatile, robust, simple and suitable for use in building, industry, maritime, on-shore, off-shore, etc. All products are available from stock.

SPECIAL SOLUTIONS

The specialists from the Solutions department design, produce and test a wide variety of special products with a capacity up to 500 t and beyond, in accordance with customer requirements. Special products are: Crane blocks, Rotablocks, lifting beams, wire rope blocks, C-hooks, directional blocks, sheaves, swivels, etc.

All our products are CE & UKCA conform.

They are all delivered with instruction manual + CE/UKCA certificate

TOPAL special designs

Tractel Solutions SAS manufactures on request a wide range of lifting clamps, either derived from standard clamps or designed for a special application.

From a simple polyurethane coating on an existing clamp up to a completely new design.

If you have any special needs, please contact us:

Tractel Solutions S.A.S.

Phone: +33 4 78 50 18 18

Horizontal plate hooks

Made in France

QR - Double Lifting Hook

- Double hooks for lifting horizontal plates
- Use in pairs with a 4-legged sling
- Manufactured without load bearing welds
- Hot epoxy coating
- Safety factor: 3 5EN 13155.2003 norm°

Model	WLL	Jaw Opening (mm)	Weight (kg)	Product Code

Made in France

QS Single Lifting Hook

Single lifting hook for the horizontal transport of plates, bundles or construction parts. For use in configurations of 4 or more clamps. Lifting chain available upon request. Opening 300 mm, very suitable for thick plates.

Use in 4s with two 2-legged slings and lifting beam.

- Fixed model 300 mm
- Easy to use
- Hot epoxy coating

Drum Clamps

Made in France

HF Drum Clamp

- Semi-automatic clamp for lifting horizontal steel drums with rim
- Manufactured without load bearing welds
- Hot epoxy coating
- Safety factor: 3 (EN 13155.2003 standard)

Model	WLL	Jaw Opening (mm)	Weight (kg)	Product Code
HF05 440-920	500	440-920	6	50208

VDL Drum Clamp

- Lifting of steel drums with rim
- Vertical or horizontal position
- Manufacture without load bearing welds
- Hot epoxy coating
- Safety factor: 3 (EN 13155.2003 norm)

Model	WLL	Jaw Opening (mm)	Weight (kg)	Product Code
VDL-1	1,000	150-950	3.5	54398

Made in France

VLF Drum Clamp

- Clamps for lifting vertical steel drums with rim
- Manufacture without load bearing welds
- Hot epoxy coating
- Safety factor: 3 (EN 13155.2003 norm)

Model	WLL	Jaw Opening (mm)	Weight (kg)	Product Code
VLF05 600	500	600	6.7	51268
VLF08 600	800	600	9.6	51278

Drum clamps

VFR Drum Clamp

- Semi-automatic clamps for vertical steel drum lifting
- Manufacture without load bearing welds
- Hot epoxy coating
- Safety factor: 3 (EN 13155.2003 norm)

Model	WLL	Jaw Opening (mm)	Weight (kg)	Product Code
VFR05 5	500	400-500	12	51248
VFR05 6	500	500-600	14	51258

Made in France

VFA Drum Clamp

- Lifting of steel drums
- Vertical position (with diameter 600 mm)
- Manufactured without load bearing welds
- Hot epoxy coating
- Safety factor: 3 (EN 13155.2003 norm.)

Model	WLL	Jaw Opening (mm)	Weight (kg)	Product Code
VFA 025	300	600	24	51208

Made in France

VFB Drum Clamp

- VFB03-S: semi-automatic release.
- VFB03-A: fully automatic locking and release.
- VFB03-AR: with reduction gear for emptying the contents of the drum accurately and effortlessly.
- Tilting the drums
- Handles for easy use
- Durable
- Clamping jaw with nitrile finish for optimal grip
- Available in 3 versions
- Hot epoxy coating

Model	WLL	Jaw Opening (mm)	Weight (kg)	Product Code
VFB 03 S	300	600	53	51218

KP Lifting Clamp For Beam Profiles

Lifting clamp for lifting I or H beams or plates in a horizontal position.

Automatic locking with a safety spring.

Depending on the weight of the load, the clamp will only leave a mark on one side.

- Automatically grabs the load
- Hardness 330 HB
- Hot epoxy coating

Model	WLL	Jaw Opening (mm)	Weight (kg)	Product Code
KP1 0-20	1,500	0-20	4	50218
KP2 0-30	3,000	0-30	10	50228

Made in France

Topal™ PL - Lifting Clamp For Beam Profiles

- Semi-automatic girder clamps
- Lifting of I or H-profiled girders
- Manufacture without load bearing welds
- Hot epoxy coating
- Safety factor: 3 (EN 13155.2003 norm)
- Unique safety device preventing the clamp to be fully closed

Model	WLL	Jaw Opening (mm)	Weight (kg)	Product Code

Safety parking clamp

The Safety parking clamps (SPC) are dedicated to securing lifting platforms used in the elevator industry by attaching the platform to the guiding rail. They are used as a secondary safety device, a primary safety device is mandatory.

In case of breaking of the lifting cable, the platform will fall and will immediately be blocked by the clamp.

- The **back** Safety parking clamp (BSPC), is attached to the back of the guiding rail of the elevator platform.
- The back safety parking clamp has a wider range but, it requires enough free space at the back of the rail (110 mm without the shackle, ~120 mm with the shackle) to be installed, and is limited to 1.5t capacity.
- The **front** Safety parking clamp (FSPC) is attached to the front of the guiding rail of the elevator platform.
- The front safety parking clamp has a smaller range, is a bit lighter but has a higher capacity (2 t) and can be installed on every installation, since the required space behind the rail is very limited (20 mm minimum). It offers PVC covered handles to ease manipulation.

The safety parking clamps are designed to work on standard ISO 7465 rails, used for elevators. Other uses are forbidden.

PAL-Beam Lifting Beam

Range of lifting beams with fixed or adjustable load-centre fitted with 2 exclusive lower pivots allowing additional lifting applications with profile and/ or lower pivots' inclined:

A- Lifting with symmetrical or asymmetrical lower pivots, pulling sideways outside or inside (max angle 15°).

B- Lifting with profile inclined at 6° out of the horizontal line:

- vertical traction with symmetrical lower pivots
- sideways traction with asymmetrical lower pivots

Made in France

Pal-Turn

The Pal-Turn has been specially developed to create a solution for the controlled turning and lifting of heavy and bulky loads. The tilt straps are rotated by 2 circulation tilt discs which are electrically driven. Suitable for applications in steel and machinery factories, civil engineering, shipyards, manufacturing industry and foundries. The use of Pal-Turn™ does not require an anchorage point on the returned load - the load is usually held in the straps. Each device allows the turning of several types of loads as long as its capacity allows it and the straps available are of an appropriate length.

- Tilting loads
- Shockproof
- Tilt disc circulation fixed or adjustable
- Available in single tilt strap version (mono)
- Electric operation
- Capacity from 0.5 ton to 100 tons

Important:

The load must keep its shape at all times during the roll-over movement.

Customized advice

Each load has unique dimensions (lxwxh), a specific weight and position of the centre of gravity. The Pal-Turn™ is produced on the basis of these characteristics and customer requirements.

Options:

- Chain pulleys for high temperature loads (> 80°C)
- Stand-alone model (battery operated)
- Radio control with or without infra-red validation
- Two-speed motorisation
- Frequency inverter
- Additional lifting points, retractable lower hook
- Chains or straps - open or open-ended - adjusted to the load, polyurethane protection coated on 1 or 2 sides, impregnated
- Protection class IP55 or higher
- Design according to other FEM class

Standard configuration:

- Cable remote control, single-speed motorisation
- Protection class IP54
- Design according to FEM A5, lifting speed 30 m/min.
- 500kg in 400V or 230V

Model	Product Code
500kg - 230V	211978
500kg - 400V	211968

Specific Lifting Beam

Rotablock

Special hook

Motorization of the hook rotation : for lifting, turning and positioning of loads from a distance.
Designed to handle all capacities.

Numerous applications:

- automotive industries,
- nuclear...

Wall Mounted Cranes

Overbraced wall mounted jib cranes

- Mechanically welded steel construction
- Polyurethane paint RAL 128
- Supplied ready to assembly(including 2 mounting brackets)

Underbraced wall mounted cranes

Maximum working height

- Mechanically welded steel construction
- Polyurethane paint RAL 1028
- Supplied ready to assembly (including 2 mounting brackets)

Wall mounted jib crane - hollow profile construction

- Polyurethane paint : RAL 1028
- Supplied ready to assembly
- Lifting gear speed : a < 8m/min
- Indoor use only
- Flat cable powerline included
- This jib cannot be motorized / push trolley only

Column Mounted Jib Cranes

Column mounted jib cranes - overbraced

- Standard height under beam of 2,5 m
- Polyurethane paint: RAL 1028
- Supplied ready to assembly

Column mounted jib cranes - underbraced

- Standard height under beam of 3 m
- Polyurethane paint RAL 1028
- Supplied ready to assembly

Column mounted jib cranes - hollow profile construction

- Polyurethane paint: RAL 1028
- Supplied ready to assembly
- Lifting gear speed: a < 8 m/min
- Indoor use only
- Flat cable powerline included
- This jib cannot be motorized / push trolley only

Column mounted jib cranes - 360° slewing

- Standard height under beam is 3 m
- Polyurethane paint: RAL 1028
- Supplied ready to assembly
- Lifting gear speed: a < 8m/min
- Flat cable power line included
- 360° slewing

Portal Cranes

Portal cranes - movable when loaded

- Movable when loaded on flat, smooth and clean surface,
- Disassembly with 3 components
- Polyurethane paint: RAL 1028 (yellow)
- Lifting gear horizontal speed > 10 m/min
- Equipped with 4 polyamide swivel wheels
- Indoor use
- W.L.L. from 500 to 3200 kg

Portal cranes - hollow profile construction

- Movable only when not loaded on flat, smooth and clean surface
- Equipped with a hoist trolley, cable trolley and power cable
- Equipped with 4 white polyamide swivel wheels
- Disassembly with 3 components
- Polyurethane paint: RAL 1028
- Indoor use
- W.L.L. from 500 to 1600 kg

The tracpode is a mobile lifting facility to lift loads up to 500 kg
Foldable, its compact structure enables transportation in small construction vans

Dimensions:

- Dis assembled : 1,76 m basic, 1,88m equipped with a sheave
- Assembled : L. 1,95m x l 0,31m x h 0,36m

The tracode's top is equipped with an anchoring point identified for lifting purposes.
The top anchor facility is engineered for the installation of hoists with a W.L.L. up to 500 kg.

The tracpode's legs can be foreseen with a bracket for the caRol winch. In this configuration, the Tracpode must be equipped with a lifting sheave kit for the Tracpode's top anchor.

Features:

- Adjustable from 1,78 to 2,73 m (maximum height on the top)
- Depending on the height, its ground position varies from 1,03 to 1,58 m
- The legs are adjustable every 20 cm.
- Lower parts of the legs are equipped with anti-slip covers made of vulcanized rubber
- Lower parts of the legs are perforated to enable fixing by means of anchoring pins
- **Safety webbing sling to strap the feet at the bottom and to avoid any sliding** (mandatory if the tracpode is equipped with a hoist or winch with a W.L.L. over 250 kg).

Blocmat

Load arrester

Blocmat™ load arrester

Blocmat™ S Ceiling Assembly and SI, Floor Assembly

Automatic wire rope load arrester with an integrated drum reeler.

The Blocmat is an automatic wire rope load arrester with an integrated drum reeler. A falling load will be arrested within 10 cm by the Blocmat. It is easy to carry out a functional test and to manually release and reset the load arrester. After activation, release, and reset the system can immediately be used again.

Available models in the Blocmat series:

- S - Ceiling assembly
- SI - Floor assembly (to be used with additional sheave)

Features Blocmat S Ceiling assembly and SI Floor assembly:

- Very limited fall (<100 mm)
- Triggering speed 30m/min
- Automatic winding of wire rope
- Very robust and durable
- Easy to use
- Manual test function
- Capacity up to 1,000 kg
- Complies with the 2006/42/EC standard

Blocmat

Load arrester

Blocmat TSD

Blocmat TSD, Self-Retracting Load Fall Arrest, is equipped with the new TSD system (Top System Dissipator) The TSD system guarantees a falling load of less than 650daN even if the load drops when the cable is fully unwound.

The main advantages of using the Blocmat TSD, self-retracting load fall arrester are:

- Integration of the TSD system at the top of the device. This eliminates the risk of a violent shock if the load drops when the cable is fully unwound.
- A very good grip for transport and installation.
- Simplified maintenance due to its optimized design

Modèle	CMU (kg)	Dimensions (mm)	Longueur câble (mm)	Ø câble (mm)	Vitesse (m/min)	Poids (kg)	Code produit

Material-only load arrester

Modèle	CMU (kg)	Code produit
BSO 500 P	600	291569
BSO 1020 P	800	291609
BSO 1030 P	1,000	291639
BSO 1040 P	1,200	291669
BSO 2050 P	2,000	291699
BSO 3060	3,000	291989

The Blocstop BSO can be used in numerous areas like a load arrester for material transportation (i.e. opening and closing of a garage door, lifting of valuable material load, protection for a sensible ground surface underneath the load....)

BSO – Blocstop operating by overspeed detection :

If the movement of the safety rope exceeds a specified speed then the BSO triggers automatically and securely catches the load. The safety rope is held between the clamping jaws, preventing the rope from slipping any further. However, the surface of the clamping jaws is large enough to prevent damage to the rope. The Blocstop BSO is designed in such a way that the clamping jaws grip tighter, the higher the load on the rope.

Furthermore, the Blocstop BSO has been tested using many times the nominal load in order to ensure an extremely large safety margin.

We are constantly working to improve our products.

Features Blocstop BSO :

- Very robust and durable
- Small, light and compact
- Manual test function
- Capacity up to 3,000 kg
- Complies with the 2006/42/EC standard

Floor Handling Equipment

Pakrol skates and trolley skates

Pakrol™ skates and trolley skates are designed for easy and smooth transport of heavy loads across a flat and smooth floor.

The floor should be checked to ensure it has sufficient load-carrying capacity and if necessary flat steel plates should be used to carry the Pakrol™ and load.

The Pakrol™ skates and trolley skates can be used in combination to move loads from 2000kg to 20000kg.

- WLL 2000kg to 20000kg
- Robust construction
- A modular system to steer and move loads
- Trolley skates have turntables
- Skates can be joined together to increase capacity
- Nylon or PU rollers with ball bearings
- The load can be pulled and steered by the drawbar
- The floor must be completely smooth and flat in order to move the loads.

Floor Handling Equipment

Top mechanical toe jacks

The Top mechanical toe jacks have a back and forth action on the handle to allow them to be operated in confined spaces.

With 100% capacity on both head and toe the Top jacks are designed for ultimate usage and can be operated in either vertically or horizontally.

- WLL 1.500 kg to 10.000 kg
- Robust steel construction
- Vertical and horizontal operation
- Load capacity 100% on the head or toe
- Crank with folding handle
- Back and forth action on the handle

Handifor 200	200	±1	0.5	0.9	199949

Delivery includes the Handifor, S-hook and carabiner hook, user manual and declaration of conformity. Supplied in sturdy cardboard packaging.

Dynafor Industrial

Featuring an integrated display, the Dynafor Industrial series of load indicators provides great value, with an accuracy of 0.3%.

- Capacity range from 1t up to 20t
- 5-digit LCD display, 18mm height
- 0.3% accuracy of measuring range
- Automatic time off set at 20 min (removal in option)
- Multiple integrated functions (On, Tare, Peak Hold, Units change)
- Units (kg, lbs, daN)
- IP65 protection rating
- QR code on front face leading to technical documentation and traceability at all time

Dynafor Pro

The Dynafor Pro is the last version of a versatile and robust wireless digital dynamometer, used in various weighing and force measurement applications.

- Capacity range from 1t up to 250t
- Wireless connection using Radio-Frequency 2.4Ghz with Tractel® Dynafor HHD, large displays AL63, DMU and software accessories, up to 400m
- Wireless connection using Bluetooth® with any smartphone equipped with our free app', up to 30m
- Both Bluetooth® and Radio-Frequency 2.4 GHz available simultaneously
- Various possibilities using several Pro and accessories
- 0.2% accuracy of measuring range
- IP 65 protection rating (IP 67 in option)
- QR Code apposed on product leading to technical and traceability documentation

Modèle	Description	CMU (t)	Code produit	Weight (t)	Product Code

Dynafor Pro

Accessories

Dynafor™ HHD

The Dynafor HHD is a complete and versatile handheld display.

Universal, it can be connected to our Dynafor Pro, Dynafor Expert and Dynafor Transmitter WL.

- Wireless range up to 400m
- Single and multi-sensors (max. 4) reading with sum function
- Multiple display units (daN, kg, t, US Ton, lbs,kN)
- Tare & Peak hold functions
- Ergonomic interface
- Settable alarms with incorporated buzzer
- Manual data recording with up to 100 measures
- Autonomy up to 48h. Equipped with rechargeable battery. Charger included.
- Can be used in combination with large displays AL63 and DMU for modular solutions
- Can be used with Tractel App at the same time
- QR Code apposed on product for technical and traceability documentation

Dynafor AL63

High visibility displays

The Dynafor AL63 is designed to visualize the efforts or loads measured by one up to 4 sensors in a large display.

It can be wirelessly connected to our Dynafor Pro, Dynafor Expert and Dynafor Transmitter WL, up to 200m range.

It also can be wired-connected to our Dynafor Transmitter RS.

- Connection from 1 up to 4 sensors, with automatic sum function.
- Tare, peak hold, unit's selection with the TLC remote control.
- Communication between Dynafor AL63 and sensors either through BUS RS 485, either through RadioFrequency 2.4 GHz
- Can be used with monitor Dynafor DMU

Multiple configurations of monitors, sensors and displays are possible.

Dynasoft - Softwares for Dynafor

PC solutions

Tractel offers a wide range of softwares, compatible with Windows versions:

- Dynasoft Download to simply unload the measurements saved in our Dynafor HHD in order to analyze the extracted data
- Dynasoft Threshold Management to extract the data related to the thresholds saved in our Dynafor HHD
- Dynasoft Monitoring to have a real-time monitoring solution. The software, to be used conjointly with our Dynafor HHD, allows to read up to 16 sensors at the same time.
- Dynasoft Adjustment that needs to be used with our Dynafor Transmitter WL & RS. This software is mandatory to perform calibration.

Model	Product Code
Dynasoft Basic (incl. Loader & Threshold management)	293509
Dynasoft Premium (incl. Monitoring, Loader & Threshold Management)	294479

Softwares are delivered informatically, with an activation code.
Software activation requires Internet connection.

Dynafor Expert

The Dynafor Expert specific mechanical design allows it to be extremely precise.

- Capacity range from 0.5t up to 10t
- Wireless connection using Radio-Frequency 2.4Ghz with Tractel® Dynafor HHD, large displays AL63, DMU and software accessories, up to 400m
- Wireless connection using Bluetooth® with any smartphone equipped with our free app', up to 30m
- Both Bluetooth® and Radio-Frequency 2.4 GHz available simultaneously
- Various possibilities using several Expert and accessories
- 0.1% accuracy of measuring range
- IP 64 protection rating (IP 67 in option)
- Unique loadcell compatible with clevis hooks and shackles
- QR Code apposed on product leading to technical and traceability documentation

Mechanical Dynasafe

Quick and reliable load limiters

Dynasafe™ Mecha

Wire rope load limiter

The Dynasafe Mecha is a mechanical load limiter to be installed on a steel wire rope.

- 2 independant thresholds (max. 4A / 230 VAC)
- Can be used for overload protection, wire rope slack detection and others
- Easy to mount
- Repeatability of 1%
- Cable gland output - Length 2m
- QR Code apposed on product for technical and traceability documentation
- Factory setting available in option

Model	W.L.L (kg)	Rope Diameter (mm)	Product Code
Dynasafe Mecha 3.2	3200	5-16	293599
Dynasafe Mecha 7	7000	17-26	38658
Dynasafe Mecha 12	12000	27-36	38668
Option Mecha 3.2 - Extra cable lenght (max 10m)			282847

The delivery includes the Dynasafe Mecha, its user manual, its declaration of conformity. Supplied in sturdy cardboard packaging

Dynasafe™ HF 05

Dead-end load limiter

The Dynasafe HF05 is a mechanical load limiter to be installed on a fixed point (dead-end or specific mechanical design)

- Capacity up to 8 t
- 2 independant thresholds (max. 4A / 230 VAC)
- Can be used for overload protection and others
- Cable gland output - Length 2m
- Factory setting available in option

Model	W.L.L (kg)	Product Code
HF05/1/A2/AL	500	207298
HF05/2/A2/AL	1 250	207308
HF05/3/A2/AL	2 000	207318
HF05/4/A2/AL	3 200	207328

HF05/6/A2/AL	8 000	207348

The delivery includes the Dynasafe HF05, its user manual, its declaration of conformity. Supplied in sturdy cardboard packaging

Dynasafe Mecha and HF05 setting

Model	Product Code
Option - Factory preset for Mecha 3.2	281407
Option - Factory preset for HF05, Mecha 7 & 12	73887

Price is for one threshold setting. For Mecha, setting is done on wire ropes of structure 6X36 or 7X19, at the nearest diameter available at factory.

Electronic Dynasafe

Applications

When a mechanical solution is not enough, and you want to :

- Display a load
- Integrate a sensor signal to your PLC (Programmable Logic Controller)
- Do real-time monitoring and relay management
- Manage several sensors individually and together

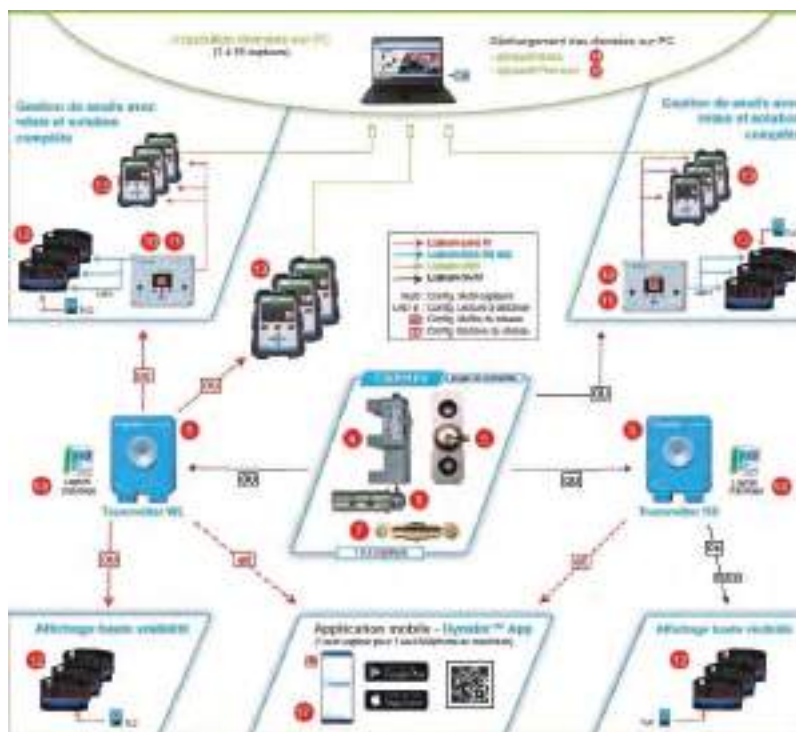

From the sensor definition, to the accessories option, Tractel supports you in defining an electronic solution that meets your requirements.

How to define a Dynasafe solution

1. Select or design a strain gauge sensor that fits perfectly in your application. Tractel offers standards sensors as well as specific sensors.
2. Define what type of connection do you need :
 - Wired connection through our Dynafor™ Transmitter RS
 - Wireless connection through our Dynafor™ Transmitter WL
 - Standard wired conditioner for analog output (4-20 mA, 0-10V)
3. Select the correct Tractel accessories to fulfill your needs

A fully modular system

Dynasafe

1. Strain gauge sensor

Dynasafe HF35

Wire rope electronic sensor

- Electronic loadcell for installation on a wire rope
- 1% accuracy of measuring range
- Capacity range from 2t to 20t
- Compatible with wire rope diameters 5 to 45 mm
- Cable gland output
- Customized signal output : mV/V, 0-10V, 4-20mA, Hz

Specify wire rope diameter, capacity on fall and signal output with your request.

Dynasafe HF10

Wired loadlink

- Electronic loadcell for installation on dead-end or integrated in a machine
- 0.2% accuracy of measuring range
- Capacity range from 1.6t to 16t
- Cable gland output
- Customized signal output : mV/V, 0-10V, 4-20mA, Hz

Specify effort and signal output with your request.

Dynasafe HF50

Load pin

- Shear stress electronic loadcell for installation as a shaft
- Most integrated product with no headroom loss
- 0.5% accuracy of measuring range
- Capacity range from 1.6t to 16t
- Mechanical design according to customer's specification
- Custom capacity
- Cable gland output
- Customized signal output : mV/V, 0-10V, 4-20mA, Hz

Fulfill the loadpin specification sheet with your request.

Others designs available. For any request please contact us at : adv@tractel.com

Signal conditioner

2. Connection

Dynafor™ Transmitter WL & RS

The Dynafor Transmitter WL & RS are conditioners used to format the signal generated by a strain gauge sensor into a signal readable by our wired and wireless accessories.

It can be used with any sensor that has a mV/V output.

- Capacity defined by the associated sensor
- WL version :
 - Radio-Frequency 2.4GHz chipset for wireless range up to 400m with our accessories (HHD, AL63, DMU and softwares)
 - Bluetooth chipset for a connection to any smartdevice equipped with our free app', up to 30m
 - Both Bluetooth and Radio-Frequency 2.4 GHz available
- RS version :
 - RS485 output (proprietary) for a wired connection with accessories.
 - Bluetooth chipset aswell as WL version
 - Both RS485 and Bluetooth available
- Powered by 3 AA batteries for WL version, RS485 for RS version
- Combined with our required software "Dynasoft Adjustment", the system {Dynafor Transmitter RS or WL + sensor} is adjustable by the end-user for high accuracy.

Model	Product Code
Dynafor Transmitter RS	293469
Dynafor Transmitter WL	293459

The delivery includes the Dynafor Transmitter WL & RS, its user manual, its rugged plastic cover and its declaration of conformity. Supplied in sturdy cardboard packaging

Made in France

Dynasoft - Softwares for Dynafor

PC solutions

Modèle	Code produit
Dynasoft Adjustment	199529

Software is delivered with a USB dongle, used for the connection between the Transmitter and the PC.

Once the Transmitter is selected, the system can communicate with our wired and wireless Tractel accessories (DMU, HHD, AL), presented on next pages

Dynafor™ HHD

The Dynafor HHD is a complete and versatile handheld display.

Universal, it can be connected to our Dynafor Pro, Dynafor Expert and Dynafor Transmitter WL.

- Wireless range up to 400m
- Single and multi-sensors (max. 4) reading with sum function
- Multiple display units (daN, kg, t, US Ton, lbs,kN)
- Tare & Peak hold functions
- Ergonomic interface
- Settable alarms with incorporated buzzer
- Manual data recording with up to 100 measures
- Autonomy up to 48h. Equipped with rechargeable battery. Charger included.

Dynarope

Tensiometers - HF 37 et HF 45

Dynarope HF37

Compact, lightweight and handy device for low capacities

The Dynarope tension meter HF37 is a precision device for measuring forces in a tensioned cable or rope, without dismantling the installation.

Can be used for guy wire maintenance, architectural wire rope installations, sailing ships, etc.

- Quick direct mounting on the wire or rope
- Capacity range from 50 to 3000 kg
- Extensive wire rope database
- 3% accuracy of measuring range, if wire rope and diameter included in the database
- Compatible with diameters from 5 to 16 mm
- LCD display directly on the sensor
- Possibility to add a wire or rope in the database

Modèle	CMU (kg)	ø câble (mm)	Code produit
Kit Dynarope HF37/1/LPT	50 - 1 500	5 - 13	190008
Kit Dynarope HF37/2/LPT	100 - 3 000	5 - 16	190018

The delivery includes the Dynarope HF37, its display, the software Loader Light, its CE certificate and its manual. Supplied in a robust plastic case.

Dynaline™ HF 45

Adapted for lifeline

Specific model, based on HF37 technology, adapted to measure precisely tension in lifelines.

- Quick direct mounting on the wire or rope thanks to modified fixing hooks
- Capacity range from 50 to 600 kg
- Specific lifeline wire rope database
- 3% accuracy of measuring range, if wire rope and diameter included in the database
- Compatible with diameters from 8 to 12 mm
- LCD display directly on the sensor
- Possibility to add a wire or rope in the database

Modèle	CMU (kg)	ø câble (mm)	Code produit
Kit Dynaline HF45/1/LPT	50 - 600	8 - 12	187998

The delivery includes the Dynaline HF45, its display, the software Loader Light, its CE certificate and its manual. Supplied in a robust plastic case.

Options and Accessories

Modèle	Code produit
Option - Specific calibration for database	111347
Software Loader: Light - transferring data to PC	193008
Software Loader Tech - Update of database remotely	193018
Software Loader Full (incl. Loader Tech + Loader Light)	187978
Software Monitor - Real time monitoring on PC	193028

In order to perform calibration, a specific sample is required.

Loader Light (unload data saved in the tensiometer) always included with the kit

Dynarope HF 36

Tension meter for high capacities

The Dynarope tension meter HF36 is a precision device for measuring forces in a tensioned cable or rope, without dismantling the installation. Can be used for equalising wire rope installations, guy wire tower applications, guy wire antennas and masts applications...

- Direct mounting on wire or rope, tightening by turning the wheel
- Extensive capacity range from 100 kg to 40t
- Various wire rope database
- 1% accuracy of measuring range, if wire rope and diameter included in the database
- Compatible with diameters from 5 to 44 mm
- Separate LCD display connected with LEMO cable
- Possibility to add a wire or rope in the database

Modèle	CMU (kg)	ø câble (mm)	Code produit
Kit Dynarope HF36/1/LPT	100 - 5 000	5 - 13	187938
Kit Dynarope HF36/2/LPT	100 - 20 000	9 - 28	187948
Kit Dynarope HF36/3/LPT*	200 - 40,000	20 - 44	187958

*For efforts above 20t, the complementary hydraulic kit is required. Contact Tractel.

The delivery includes the Dynarope HF36, its displays, the LEMO cable connection, the software Loader Light, its CE certificate and its manual. Supplied in a robust plastic case.

Dynarope HF 36

Tension meter for high capacities

The Dynarope tension meter HF36 model RWT is a very specific tensiometer designed to measure tension on catenaries, without dismantling the installation.

- Direct mounting on wire or rope, tightening by turning the wheel
- Modified support points to match catenaries shape
- Capacity range from 100 to 5000 kg with specific database
- 1% accuracy of measuring range, if wire rope and diameter included in the database
- Compatible with diameters from 9 to 28 mm
- Separate LCD display connected with LEMO cable

Modèle	CMU (kg)	ø câble (mm)	Code produit
Kit Dynarope HF36/1/RWT	100 - 5 000	9 - 28	190688

The delivery includes the Dynarope HF36, its displays, the LEMO cable connection, the software Loader Light, its CE certificate and its manual. Supplied in a robust plastic case.

Options and Accessories

Anchor test equipment

Anchor point testers and Dynaplug

Anchor Tester TA

Anchor testers TA are test specimens endowed with a breaking section calibrated to break under a determined traction force. The anchor tester must be installed between the anchor point to be tested and the loading device by means of shackles or any other adequate mechanical connection.

- Quick and reliable test
- Unique usage
- Capacity range from 600 to 4000 daN
- Breaking tolerance $\pm 10\%$

Model	Breaking load (daN)	Product Code
TA 600 - 20 plates	600	193269
TA 1000 - 20 plates	1 000	261769
TA 1200 - 20 plates	1 200	261779
TA 1500 - 20 plates	1 500	193279
TA 2000 - 20 plates	2 000	193289
TA 4000 - 10 plates	4 000	193299

The delivery includes the shear stress plates in batch of N plates, and its manual. Supplied in PE bag.

Made in France

Dynaplug HF 44

The Dynaplug anchor tester is an electronic load cell designed to measure anchor strength in construction material. Its shape as a tripod has been especially designed to minimize its influence on the concrete around the fixing.

- Stand-alone anchor tester
- Capacity range from 1 500 to 5000 daN
- 0.5% accuracy of measuring range
- Height of legs adjustable between 70 and 190 mm
- Multiple accessories provided with the tester
- LCD display integrated on the device
- Data saving and possibility to monitor the tension on a PC in option

Modèle	Code produit	Product Code
Kit Dynaplug HF44/1/LPT	1500	190028
Kit Dynaplug HF44/2/LPT	2500	190038
Kit Dynaplug HF44/3/LPT	5000	190048

The delivery includes the Dyplug HF44, 4 studs M10/M12/M14/M16 and one traction fork, 3 threaded rods to adjust the height of the legs, the software Loader Light, its CE certificate and its manual. Supplied in a robust plastic case.

Height Safety Products & systems

Safety at height

Worker safety and ergonomic working conditions are the two key topics to consider when planning work at height.

Collective protection

If working at height cannot be avoided, the installation of collective protection measures such as guard rails should be considered in the first instance. How to safely enter, exit and move around the area with collective protection are points that should be taken into consideration. All measures must be taken to prevent the performance of a particular job from leading to the temporary removal of collective protection equipment. In some instances the installation of temporary collective protection is also a good solution.

Using fall protection PPE

If it is impossible to use collective protection to protect against falls from height, PPE can be used to ensure worker safety. Before any height safety PPE is used, a fall protection plan should be created.

A fall protection plan is a safety plan for workers who will be at elevated work areas. Having a detailed fall protection plan is essential to ensure the highest degree of worker safety. The plan aims to provide a safe working environment and to manage the use of fall protection measures, techniques and equipment.

The following 7 topics should always be addressed in your fall protection plan:

- Assess all fall hazards in the work area
- The fall protection applications employees will be conducting in and the equipment they will need to work safely
- Correct procedures for assembly, use, inspection, maintenance and disassembly of fall protection systems used
- Correct procedures for handling, storage and securing of tools and materials
- Training required for the workers working on the jobsite
- The fall protection plan must be job and site specific
- The fall protection plan must be available to all workers

HARNESSES

EN361: Personal protective equipment against falls from height. Harness belts for work restraint and fall arrest.

EN358: Personal protective equipment for work positioning and prevention of falls from a height. Belts for work positioning and restraint and work positioning lanyards. Normally encompassing side 'D' rings on the waist belt, this allows the user to incorporate a work positioning belt.

EN813: Personal protective equipment against falls from height. Work seats. The seat belt **EN813** can be incorporated on the harness **EN361**. These harnesses have a padded seat and are suitable for working in full suspension. This includes rope access and activities such as window cleaning. It allows greater comfort for the user and has an attachment point for attaching a descender.

EN1497: Rescue harness, dedicated to the design and test of the rescue features in a harness. **EN1497** can be incorporated on the harness **EN361**.

LANYARDS

EN354: Personal protective equipment against falls from height. Lanyards. These can be made from webbing or rope and are suitable for work restraint.

EN355: Personal protective equipment against falls from height. Shock absorbers. These lanyards have a shock absorber and are suitable for fall arrest and work restraint. The maximum length of the lanyard is 2m.

CONNECTORS

EN362: Personal protective equipment against falls from height. Connectors. These include connectors like karabiners, scaffold hooks and dual action hooks. They are used for connecting to anchor points and structures.

ANCHOR POINTS

EN795: fall arrest anchorage point permitting connection to the structure. Two types:

1. PPE anchorage: is transportable anchorage not permanently fixed to the structure.

type (B): Temporary anchor points, **type (E):** Dead-weight anchors

2. NOT PPE anchorage: permanently fixed to the structure

type (A): Permanent anchoring, **type (C):** Permanent lanyard systems, **type (D):** Horizontal rail systems

FALL ARREST/CONTROLLED RATE DESCENDERS/ROPE GRABS

EN360: Personal protective equipment against falls from height. Automatic Fall arresters with retractable lanyards These blocks can be made from webbing or steel wire rope and, depending on the model, can be used in horizontal or vertical applications.

EN341: Evacuator from height. Descender devices for rescue. These controlled rate descenders can be used to lower a casualty or for self rescue from height. These can be equipped with a rescue winch **EN1496**

EN1496: Rescue winch / Rescue lifting devices. These devices can be used to raise a casualty back to the anchor point in the event of an emergency. They are often used as a secondary device

EN353-1: Personal protective equipment against falls from height. Guided type fall arresters including a rigid anchor line. These are permanently installed systems that can be either wire rope or rail. They include a traveller that will allow the user to ascend and descend. This mechanism will lock off in the event of a fall.

EN567: This standard covers mountaineering equipment such as those used in rope access. It includes rope clamp and ascenders.

RIGID & VERTICAL FALL ARREST

EN353-2: Personal protective equipment against falls from height. Guided type fall arresters including a flexible anchor line. These are temporary installed systems. Depending on the model, they can be used vertically or horizontally and for work restraint or fall arrest.

HELMETS

EN397: Industrial safety helmets. Head protection suitable for construction site use.

ADDITIONAL TECHNICAL SPECIFICATIONS

CNB/P/11.060 (horizontal use for the blocfor™ range)

CNB/P/11.062 (use with more than 100 kg user weight)

CNB/P/11.074 horizontal use for the lanyards range)

CNB/P/11.075 (horizontal use for the stopfor™ range)

CNP/P/11.085 (Retractable fall arrest device, Fall Factor 2)

COLLECTIVE PROTECTION

EN13374-A: Temporary edge protection systems. temporary guardrail. It specifies the requirements and test methods for temporary edge protection systems for use during construction or maintenance of buildings and other structures.

EN14122-4: Safety of machinery — Permanent means of access to machinery. It gives requirements for non-powered guardrails which are a part of a stationary machine, and to the non-powered adjustable parts (e.g. foldable, slidable) and movable parts of those fixed means of access.

Norms

Before choosing fall protection, it is important to look at the environment and the situation in which you work. Each situation requires a specific approach, as well as appropriate equipment.

European standards recognize 5 types of fall protection.

EQUIPMENT REQUIRED

- Anchoring (EN 795)
- Harness (EN 361)
- Fall arrester (EN 355, EN 353-2, EN 360)
- Safety helmet (EN 397)

Fall arrest

A fall arrest system prevents the user from falling to the ground in the case of a free fall. Its role is to arrest a fall safely by limiting the force of shock suffered by the user. It must be used with enough space that is free from obstacles, allowing the free fall (fall clearance).

EQUIPMENT REQUIRED

- Anchoring (EN 795-A, B, D)
- Harness (EN 361, EN 358, EN 813)
- Fall arrester (EN 360, EN 353-2)
- Ascender (EN 567)
- Descender (EN 341)
- Safety helmet (EN 397)

Working while suspended (rope access work)

A suspension work system allows a user to move on a rope when they are no longer in contact with a structure. The user moves in suspension, using a safety harness equipped with an umbilical attachment point, to which a vertical displacement system is connected.

This device is not intended to stop a fall and must be used in conjunction to a fall arrest system.

EQUIPMENT REQUIRED

- Anchoring (EN 795)
- Harness or safety belt (EN 361, EN 358)
- Lanyard (EN 354)
- Adjustable lanyard (EN 358)
- Safety helmet (EN 397)

Work restraint

A restraint system allows delimitation of a workspace, preventing the worker from entering an area which has a risk of falling.

This type of device is not intended to stop a fall from height.

EQUIPMENT REQUIRED

- Anchoring (EN 795)
- Harness (EN 361, EN 1497)
- Rescue or evacuation equipment (EN 341, EN 1496)
- Safety helmet (EN 397)

Rescue

A rescue system can evacuate a user on a vertical axis from top to bottom or from bottom to top. The use must be assessed before each intervention and the rescue system should be adapted to the site. Staff must be trained in its use.

EQUIPMENT REQUIRED

- Anchoring (EN 795)
- Work positioning harness and belt (EN 361, EN 358)
- Work positioning lanyard (EN 358)
- Safety helmet (EN 397)

Work positioning

A work positioning system secures the operator at the place of work.

It consists of a work positioning belt and an adjustable lanyard. This system lets the operator make precise positional adjustments at the place of work while keeping both of his or her hands free to perform the task.

The purpose of this device is not to arrest a fall, it must be used in conjunction with a fall arrest system.

Tractel's fall arrest equipment specifications

High capacity range 150 kg and use of fall arrest equipment on sharp edges

Tractel is one of the first manufacturers to develop a complete range of fall arrest systems with a capacity greater than 100 kg, compliant with the EC requirements.

This range, including anchoring systems, connectors, fall arresters, automatic fall arresters, sliding fall arresters, harnesses, belts, and thigh straps, is tested according to European specifications:

- CNB/P/11.062 (for use above 100 kg)
- CNB/P/11.060 – 074 – 075 (for horizontal use / EDGE compliant)

This range is tested to stop the fall of an operator weighing 150 kg (this figure includes the weight of a person and their equipment) and allows employees to work safely at height, both vertically and horizontally, and in roof / edge applications.

In order to provide protection for the user up to the maximum allowed weight, the entire security line (anchorage – fall arrester – harness) must be HIGH CAPACITY RANGE 150 KG.

Attention: the weakest element in the chain always determines the maximum resistance for the entire system.

Use of the Tractel® fall arrest equipment on sharp edges:

Tractel fall protection PPE is intended for working at height, where there is a risk of falling vertically, as well as for working at height on a horizontal surface, where there is a risk of falling over a sharp edge (roof terrace use.)

Therefore, our ranges blocfor™*, stopfor™* and lanyards* are certified according to the sheets:

- **CNB/P/11.060** (for the blocfor range)
- **CNB/P/11.074** (for the lanyards range)
- **CNB/P/11.075** (for the stopfor range)

Tractel products are tested to stop the fall of a person, including safety equipment and tools, weighing up to 150 kg.

Selecting your fall protection PPE

Tractel® offers a full range of Personal Protective Equipment (PPE) in order to offer the support and safety necessary to protect yourself from the risk of falling when working at height. With over 70 years of industry experience, Tractel® has built a culture of safety through its ingenuity in manufacturing innovative and high quality products.

BASIC REQUIREMENTS OF PPE

- PPE must be suitable for the user.
- PPE must be properly maintained and stored.
- The user must be trained and / or informed in the use, care and maintenance of the equipment.
- Employers must evaluate the PPE requirements.
- Employees must report any loss or damage to the PPE.
- PPE must be compatible with the systems used.

CREATE YOUR FALL ARREST SYSTEM

To protect yourself in the event of a fall, you must have a fall arrest system that will stop and support you.

This fall arrest system must contain:

- An anchor
- Fall arrester (rope grab, self-retracting lanyard, energy absorber)
- A safety harness

Your fall arrest system can be supplemented with a lanyard that limits your movements within a secured area

While working at height using fall arrest equipment, a helmet must be worn that is certified to EN 397, with chin strap and 4 fixing points and classified as PPE category III.

Industrial maintenance

Kits for industrial maintenance, with adjustable length fall arrester lanyard with ring to create an anchor point.

Harness details

Attachment points

DORSAL

Fall arrest attachment point, marked with the letter "A", present on all EN 361-compliant harnesses.

STERNAL

EN 361-compliant fall arrest attachment point, marked with the letter "A", and "A/2".

THORACIC

EN 361-compliant fall arrest attachment point, marked with the letter "A", and EN 358-compliant work positioning point.

UMBILICAL

Attachment point for work while suspended (rope access work) EN 813.
Cannot be used as an anchor point for fall arrest purposes.

LATERAL

Attachment point for EN 358-compliant work positioning systems.
Cannot be used as an anchor point for fall arrest purposes.

Harness HT Transport

EN361 - EN358 - EN813

Harness for working on pylons, ensuring easy climbing, staying in position on the job and designed for working in suspension.

- 1 dorsal with a big forged D anchorage to eliminate the risk of carabiner disconnection.
- 1 sternal anchorage textile loop.
- 1 umbilical suspension point textile loop.
- 2 lateral belt-attachment points.
- X-pad comfort back pad: Breathable and flexible - it gives the harness shape to make it easier to put on.
- Quick-release buckles.
- Sliders for strap adjustment. Cannot be removed for security reasons.
- Fall indicator on each attachment point.
- High-comfort, mountaineering design leg straps (adjustable slider).

Harness HT55 Confined Space

EN 361

The HT55 harness can be used for confined space. It is particularly suited for use with a respiratory system which slides easily onto the belt.

Enhanced comfort is ensured by the back XPad, the mountaineering-type thigh straps, and the linkage between the shoulder straps and thigh straps by connecting buckles.

The harness is very easy to slip on as it opens fully at the front with the X-Pad preserving the harness form.

- Universal and very comfortable harness, automatic with extra comfort for long periods of work
- 1 dorsal with a big forged D anchorage to eliminate the risk of carabiner disconnection
- 1 sternal anchorage
- 1 special belt for respiratory system
- 1 comfort sub-pelvic strap
- Sliders for strap adjustment. Cannot be removed for security reasons
- 3 adjustment points
- Independent mountain leg strap High-comfort
- X-pad comfort back pad: Breathable and flexible - it gives the harness shape to make it easier to put on.
- Fall indicator in each anchorage
- Label holder

Ladytrac harness

A harness designed for women, a Tractel patented design.

EN361

At last, a harness designed for women:

- IPAF Innovation Award (International Powered Access Federation), Bauma 2010
- 1st Prize for Innovation, Expoprotection

A design adapted to the female form:

- The position of the straps are adapted to a woman's shape
- No friction on the upper body caused by the positioning of the straps
- The jacket fits the user's shape
- Comfort dedicated to women: light belt with elastic canvas

Increased safety in case of a fall:

- Much lower risks of lesions to the breast caused by contact with the straps in the advent of a fall
- The ladytrac patented concept ensures an ideal position of the straps on a woman's body
- Universal and very comfortable harness
- 1 dorsal forged D anchorage
- 3 Adjustment points
- Comfortable elastic jacket

In addition, the Ladytrac B version has:

- 2 belt attachment points (lateral)
- 4 Adjustment points

Harnesses HT56 and HT55

These harnesses are designed for a wide range of applications.

Enhanced comfort is ensured by the back X-Pad, the mountaineering-type thigh straps and the linkage between the shoulder straps and thigh straps by connecting buckles.

The harnesses are very easy to put on as it opens fully at the front with the X-Pad preserving the harness form.

- Universal and very comfortable harness automatic with big confort for a long work.
- 1 dorsal with a big Forged D anchorage to eliminate the risk of carabiner disconnection & 1 sternal anchorage.
- 2 thoracic anchorage forged D for the HT56.
- 1 comfort subpelviene strap / 3 adjustment points.
- Sliders for strap adjustment. Cannot be removed for security reasons.
- Independent mountain leg strap High-comfort.
- X-pad comfort back pad: Breathable and flexible - it gives the harness shape to make it easier to put on.
- Fall indicator on each anchorage.
- Label holder: ideal to customise the harness with a name, logo, information, etc..

Harness HT120

EN361

Harness designed for movement (up or down) on structures equipped with an EN 353.1 rail or cable fall arrester device equipped with an approved fall arrest umbilical anti-fallback system attachment point.

The HT120 harness is equipped with an approved fall arrest umbilical attachment point. This attachment point, while being fall arrest approved, provides comfortable support going up or down. HT 120 is the only harness on the market that offers this type of attachment point.

The HT120 harness is particularly adapted for climbing on ladders equipped with a rail-mounted FABA type fall arrester, whether or not including a tractelift climbing aid system.

It's patented design prevents the user from falling backwards in the event of a fall, eliminating the risk of serious back injuries

- 1 dorsal attachment point.
- 2 thoracic attachment points.
- 1 umbilical attachment point.

Harness HT22R

EN361 - EN1497

Universal harness with standard buckles and rescue straps.

The HT22R is a harness specifically designed to rescue an operator working in a confined space. It is equipped with an emergency strap attached to the shoulder straps. This strap allows the operator to be raised in a perfect vertical position which facilitates the exit of the body through the manhole.

- 1 dorsal anchor point.
- 1 sternal anchorage point in textile loop.
- 1 sub-pelvic strap.
- 5 adjustment loops.

How to correctly put on a harness

1

Hold the harness up by the rear "D" ring, and check for any twists or tangles.

2

Put both of your arms through the shoulder straps.

3

Connect the front buckle and tighten.

4

Connect the leg straps and tighten.

5

Adjust the straps. The harness should be snug but not overly tight.

6

The harness is now fitted correctly. The rear "D" ring should be between the shoulder blades and the sub pelvic strap should be positioned under the buttocks. If in doubt ask a colleague to check your harness.

Scan this QR code to visit our website (tractel.com) and view the video that shows you how to properly put on and adjust your harness.

Taking two minutes to view this video can mean the difference between safety and injury in the event of a fall.

Safety belts

CE restraint belts feature side attachment points for a support lanyard and are equipped with three tool bag buckles. The size is easily and quickly adjusted by a single set of loops. The belt is held in place with plastic loops. They can be combined with any harness from our range, using belt loops, making a fully integrated belt-harness solution.

Accessories

Comfort strap

The comfort strap is a portable, lightweight accessory that fits onto any harness and can be deployed in the event of a fall. The comfort strap has a foot loop for the user to stand in while suspended. It allows the user to stand up straight, relieving any pressure on the legs.

Suspension syncope can occur when the user is left suspended in a hanging position following a fall. During this time the harness can cut into the thighs, restricting blood flow, which can cause a series of complications including fainting and even death.

Specification

- Hardwearing zipped pouch, 80 mm diameter, 40 mm thick.
- Strap made from polyamide strap and zinc plated steel.
- Adjustment buckle.
- Easily adjustable up to 1.2 m to suit the height of the user.
- Weight: 100 g.
- User manual included within the pouch.
- Quick and easy to attach to the harness.
- Suitable for use with any Tractel® harness.

Easy to Use

Step 1 - Unzip the pouch and deploy the leg loop.

Step 2 - Place both feet in the foot loop.

Step 3 - Adjust the strap as required.

Step 4 - Stand up straight to relieve pressure on the legs.

Accessories

High-visibility vest

EN471 - EC/ISO standard 20471, class 2

Comfortable lightweight high-visibility vest specifically developed for use with TRACTEL® harnesses without belt.

Reflective vests provide double security in those situations where there may not be enough light to be seen by others and by night. It makes the wearer visible at all times and in all weathers thanks to the retroreflective warning strips.

- Fluorescent outer fabric of polycotton (80% polyester / 20% cotton): resistant to all kinds of grease and dirt.
- Black honeycomb-structure lining, 100% polyester: reduces transpiration for the wearer's comfort.
- Two double pockets on the front of the vest , each with a flap that can be closed with press studs.
- Grey 50 mm-wide retro-reflective strip.
- Light weight: 660g.
- Easy to position the harness within the vest. Fast, simple and safe donning : once the harness has been set up in the vest, the user can easily slip on the garment with the harness fitted in.
- One size only : the sides can be let in or out thanks to clever inlays connected by an elastic cord, adjustable using a clip.
- Can be washed in a standard washing machine at 60°C.

Tool holding accessories

Tractel tool holders are compatible with a vast majority of standard tools, weighing up to 5 kg. When a tool holder is utilised, it eliminates the risk of a serious accident caused by falling tools. This line of accessories does not inhibit a person's ability to fully utilise the required tools and ensures complete safety by eliminating the risk of objects falling from height.

Helmets

High visibility helmet

The high visibility safety helmet offers a high level of comfort. This model allows users to be visible day and night.

Complies with standards EN 397, EN 50365 and EN12899-1, for conventional use and low voltage electrical use.

The high visibility helmet combines advanced industrial safety standards with a modern design, specially designed to work at height with a reduced visor to maximize the visibility of the user.

Characteristics :

- Quick and precise adjustment: Adjustment by dial integrated in the suspension, from 52 to 64 cm.
- Lightweight: 420 g, allows prolonged use and better comfort.
- High resistance: Can be used down to -40 ° C.
- Fully removable and adjustable 4-point chinstrap: allows the helmet to be used for work at height or on the ground.
- Micro ventilation: allows ventilation of the head and dissipates heat.

How to choose your fall arrest device

Selecting the right fall arrest device

Self-retracting fall arrest: blocfor range

These fall arrest devices are particularly well suited to all types of work involving vertical and horizontal movement. They facilitate the operator's horizontal movement over surfaces covered with obstacles such as flat roofs or industrial sites.

Conform to standard EN 360 and to European data sheets CNB/P/11.060 (for horizontal use) & CNB/P/11/062 (for use above 100 kg).

Guided-type fall arrest on an anchor line: stopfor range

These fall arrest devices are recommended for work involving vertical movements. Some of them have also been tested for horizontal movements, which require manual assistance.

Conform to standard EN 353-2 and to European data sheets CNB/P/11.060 (for horizontal use) & CNB/P/11/062 (for use above 100 kg).

Shock-absorbing fall arrest: shock-absorbing lanyard range

These fall arrest devices are suited to tasks where the operator must be connected to the ground or for work where there is limited freedom of movement.

Conform to European data sheets CNB/P/11.060 (for horizontal use) & CNB/P/11/062 (for use above 100 kg).

WORK APPLICATIONS

- Working on scaffolding, in cradles, etc.
- Working on flat roofs.
- Maintenance work.

WORK APPLICATIONS

- Working on ladders.
- Working on roofs.
- Cleaning windows.
- Rope access work.

WORK APPLICATIONS

- Working on roofs.

Applicable standards

• EN 360 : (Blocfor range)

An automatic fall arrest device is a device equipped with a lanyard (cable or strap) kept constantly in tension. It allows for the movement of users without manual intervention. The system automatically locks when there is an acceleration of the lanyard and immobilizes the user in case of a fall. These fall arrest devices exist in different lengths and different materials are used for the lanyard.

• EN 353-2: (Stopfor range)

A fall arrest device on a flexible belay is a device that moves freely during ascent and descent and automatically hangs on the stand in case of a fall. The belaying support may be stranded rope or braided rope. These flexible supports must be weighted with a counterweight.

• EN 355: (shock absorber lanyard range)

An energy absorbing fall arrester makes it possible to arrest a fall in a short distance (max 2m). Its design ensures total safety for a drop coefficient of 2 that can generate trauma to the user. In case of a fall the absorber will tear reducing the force of the impact.

Each fall arrest described above, in the event of a fall,
will ensure that the user will not be subjected to an impact of more than 600 daN.

Blocfor 1.8 ESD

Fall arrest devices

Automatic fall arrester with strap 1.80 m for vertical or horizontal use.

For the user, the Blocfor 1.8A & 1.8B ESD has many advantages:

- Lightweight and compact, which makes it easy to carry and use.
- Aramid strap : Width of 15 mm, length of 1.45 m.
- Plastic housing, anti-UV, very resistant to shocks and ageing.
- Easy to install on different types of anchors thanks to several connectors (M10, M51 or M53).
- Easy to connect to the harness thanks to the M47 trunnion connector.
- Flexible unwinding system eliminates sticking or stopping during use.
- Presence of a swivel at the end of the strap allows for easy winding, the strap is free of any twists.
- In the event of a fall, the device triggers in less than 100 mm, reducing the distance of a fall.
- Shock-absorption system ESD is also a fall indicator, eliminating the risk of using the device after a fall. It ensures that the user will not be subjected to an impact of more than 600 daN even if the fall occurs when the cable is fully unwound.

Blocfor 1.8 EVO ESD

Fall arrest devices

To minimise the impact on a user in case of a fall, an anchor point above their head is ideal. This means the fall arrest device used comes into action immediately and therefore reduces significantly the impact energy that needs to be absorbed.

However, such an anchoring point is not always possible and often the only place to anchor is at or even below the level of the feet of the user as well as close to the edge where you can fall. This means that in case of a fall the user can fall the length of the lanyard before the fall arrest device activates, therefore generating much higher energy levels that need to be absorbed so they cannot harm the user.

This situation is often described as Fall Factor 2 and many fall arrest blocks explicitly forbid this kind of use in the user manual.

Tractel has now developed the Blocfor 1.8 Evo to work specifically in this situation.

Fall arrest device with ESD technology, suitable for vertical or horizontal use. 1.8 meter webbing.

High Capacity Range 150 kg. Complies with CNB/P/11.062.

- Complies with EN 360 and CNB/P/11.060 standards for use on edges with a minimal 0.5 mm curve radius
- Can be used vertically or with a standard deviation of 20° in relation to vertical
- Can be used horizontally without the use of a lanyard between the end of the strap and harness
- **Can be used in FALL FACTOR 2**
- Flexible unwinding system which doesn't jerk during operator movement
- Responsive system which locks automatically in the event of a fall, reducing the total drop height
- Includes Energy System Dissipater (ESD) technology which enables the device to arrest a fall even when the webbing is fully unwound
- Integrated fall indicator
- Length 1.8 metres, webbing version
- Lightweight
- ABS fibre reinforced polyamide housing
- Standard M47 swivel connector at end of shock absorber

Blocfor 1.8 DUO EVO ESD

Fall arrest devices

NEW

Double SRL for scaffolding fall protection

Depending on your activity, you can be in situations where you have to regularly change to another anchorage point. Due to the fact you are probably in an area where you have a falling hazard you have to be connected constantly.

So we developed a double blocfor, the blocfor 1.8 duo evo ESD. With this new product, you can be connected with 1 hook to the structure and if you have to pass an obstacle or change to another anchorage point you attach the second hook to the structure. When the second hook is connected you can remove the first hook. If you work like this you will be always secured.

The Blocfor 1.8 duo evo ESD, self-retracting fall arrester is equipped with the new ESD system (Extremity System Dissipator). The ESD system ensures the user an impact of less than 600 daN, even if he falls when the lanyard is fully unrolled. The ESD system reduces the violence of the impact on the user's body in the event of a fall.

Can be used for maintenance operations in gondolas, on scaffolding, climbing in masts and pylons.

- Suitable for horizontal use with edges with a minimum radius of 0.5mm.
- Can be used in fall factor 2: possibility to work above the equipment anchorage point.
- Unit equipped with an M47 connector and an M51 connector. M51 is a connector with big opening, made in aluminium: universal and light.
- Reduced space requirement.
- Very low weight.
- Good ergonomics that ensures a perfect grip.
- One end is equipped with the Tractel ESD system.

Blocfor 5 & 6 ESD

Fall arrest devices

Automatic fall arrester for **vertical and horizontal use**.

For the user, the blocfor™ 5/6 ESD has many advantages:

- Plastic housing made of a polyamide/ABS blend : very resistant to shocks and to UV.
- Aramid strap : Width of 25 mm. - length of 5 m (Blocfor 5 ESD). or 6 m (Blocfor 6 ESD).
- Simplified mechanism to optimize maintenance.
- Shock-absorption system ESD is also a fall indicator, eliminating the risk of using the device after a fall. It ensures that the user will not be subjected to an impact of more than 600 daN even if the fall occurs when the cable is fully unwound.
- Ergonomically shaped: easy to transport and to install.

Fall arrest devices

EN 360, CNB/P/11.060, CNB/P/11.062

- Fall arrest device with ESD technology suitable for use on flat roofs
- Can be used vertically or with a standard deviation of 20° in relation to vertical
- Can be used horizontally without the use of a lanyard between the end of the strap and harness
- Flexible unwinding system which doesn't jerk during operator movement
- Responsive system which locks automatically in the event of a fall, reducing the total drop height
- Includes Energy System Dissipater (ESD) technology which enables the device to arrest a fall even when the webbing is fully unwound
- Integrated fall indicator
- Length 18 or 30 metres, version with galvanised, stainless steel or synthetic cable
- Blocfor 20 housing made of polyamide reinforced with ABS fibre, anti-UV and shock resistant
- Blocfor 30 housing made of coated aluminium: highly resistant to shocks and abrasion
- Lightweight
- M47 swivel connector at end of shock absorber (Stainless steel model with stainless steel M10 hook)
- A blocking mechanism with a double locking pin which reduces the activation time

Blocfor 20R & 30R ESD

Fall arrest devices with integrated rescue winch

EN 360, EN 1496-B, CNB/P/11.062

Automatic fall arrester with galvanised rope, with integrated winch that's highly effective and easy to operate.

This product can be used as a standard fall arrest device when the winch is not engaged and to lift a worker for a safe rescue when activated after a fall.

For the user, the Blocfor 20 R ESD / 30 R ESD has many advantages:

- Plastic housing made of a polyamide/ABS blend (blocfor 20R) / Aluminium housing (blocfor 30R) : Anti-UV, very resistant to shocks and ageing.
- Shock-absorption system ESD is also a fall indicator, eliminating the risk of using the device after a fall. It ensures that the user will not be subjected to an impact of more than 600 daN even if the fall occurs when the cable is fully unwound.
- Integrate winch : Automatic fall protection device with integrated winch for ascending or descending during a possible rescue operation.

Stopfor fall arrest devices

Tractel offers a complete range of Stopfor. It is primarily split in two:

- Stopfor on stranded rope Ø14mm
- Stopfor on braided rope Ø11mm

The choice between the two kinds of product depends on the use of the Stopfor.

The braided rope is much lighter than stranded increasing the comfort of use with a long rope. While the Stopfor with the stranded rope can all be used horizontally (e.g. flat roof).

Inside each category, different versions are available depending on the application.

Product	Stopfor for stranded rope			
	B	BF	MSP	SL
150kg	✓	✓	✓	✓
Anti-reversibility	-	-	✓	✓
Pre-installed on rope	-	✓	-	-
Can be installed and removed at any point on the rope	✓	-	✓	✓
Safety Park function	-	-	✓	✓
Vertical use	✓	✓	✓	✓
Horizontal use (e.g. on flat roof)	✓	✓	✓	✓

Product	Stopfor for braided rope				
	KS 150kg	KSP 150kg	K	KS	KSP
150kg	✓	✓	-	-	-
Anti-reversibility	✓	✓	-	✓	✓
Pre-installed on rope	-	-	✓	-	-
Can be installed and removed at any point on the rope	✓	✓	-	✓	✓
Safety Park function	-	✓	-	-	✓
Vertical use	✓	✓	✓	✓	✓
Horizontal use (e.g. on flat roof)	-	-	✓	✓	✓

The version with the safety park function will be preferred when working on a roof with high inclination and work positioning is required.

A pre-installed Stopfor on a rope will be preferred when it is important for the user or owner that the rope cannot be separated from the Stopfor.

High Capacity range 150 kg

Can be used on flat roof

Fall Arresters - Stopfor

150 kg / Fall arresters on a flexible anchor line

Stopfor B - 150 kg

EN353-2 - CNB/P/11.075 - CNB/P/11.062

Absorbing and standard lanyards

Tractel offers a complete range of 150 kg lanyards. The choice depends on the activity the user has to perform, one is not excluding another. It will often happen that the user might need more than one lanyard. It is primarily split in three:

Fall arrest lanyard EN 355

Restraint lanyard EN 354

Work positioning lanyard EN 358

Fall arrest lanyards

Designed to be used in a fall arrest system, they are equipped with a shock absorber to ensure that in the event of fall, the maximum force transmitted to the user is less than 600daN. They must be used in combination with a certified safety harness and an anchor point or system. A fall arrest lanyard has the advantage to be lighter than other fall arrester.

Tractel offers **3 types of material** for its fall arrest lanyard:

- Webbing
- Braided rope
- Elastic webbing

The webbing material will be preferred for short term or occasional use, as the braided rope and the elastic webbing will be preferred for frequent and long use.

Fall arrest lanyards exist in **2 configurations**:

- Single lanyard
- Twin lanyard

The twin lanyard is designed to allow the user to move between anchor points ensuring that he is always secured. The single lanyard can be used with lifeline where there is no need to disconnect to cross anchors.

Restraint lanyards

When the lanyard is used between the harness and the anchorage point without a fall arrest system, the lanyard is intended to prevent the operator from accessing a fall hazard zone. The double lanyard version must be used in the same way, but allows movement along a fixed line while permanently connected.

RESTRAINT LANYARDS ARE NOT TO BE USED AS FALL-ARRESTERS

Work positioning lanyards

Work positioning lanyards: Designed to support the user comfortably when a hands free environment is needed. It must be connected by its two ends to the two points of attachment on either side of the belt or on the two chest anchorage points on the harness.

Tractel offers **2 types of work positioning lanyard**:

- With adjustment loop (LDR)
- With jaw tensioning device (LCM)

The first one is intended for short-term interventions and for restricted mobility. While the second one is intended for regular intervention and allows for an easy adjustment of the length of the lanyard.

The LCM03 is protected against from tools such as chainsaw or grinder.

The LCM05 with its braided offers a lighter alternative to the stranded rope of the LCM06.

The work positioning lanyard is existing in **3 different materials**:

Braided rope reinforced with a steel core (LCM03)

WORK POSITIONING LANYARDS ARE NOT TO BE USED AS FALL-ARRESTERS.

LDA 150 kg

Absorbing lanyards

EN355 - CNB/P/11.074 - CNB/P/11.062

Braided rope lanyard 12,5 mm, made of polyamide fibers 6.6 te,x with shock absorber.

Lanyard with energy absorber provides a connecting element between a fixed or mobile anchor points and the attachment point on the harness.

The energy absorber safely arrests a fall from a height. Without the shock absorber, a free fall of more than 50 cm can cause serious injury.

LSEA 150 kg

Absorbing lanyards

M10 M41

EN355 - CNB/P/11.074 - CNB/P/11.062

Strap Elastic lanyard 35 mm with energy absorber.

The elastic lanyards LSEA are lanyards formed by a strap made of rigid polyester fiber woven on an elastic fiber core.

This elastic fiber has elongation properties which allow the lanyard to stretch by one-third of its contracted length.

The outer strap made of polyester fibers woven on the elastic fiber core gives the elastic lanyards excellent resistance to abrasion and cutting when it comes into contact with a sharp edge, including in the event of a fall.

With respect to standard lanyards, the elastic lanyards LSEA provide the advantage of being more compact and therefore more comfortable in use. With respect to the elastic lanyards currently on the market, formed by a tubular strap with an elastic material inside the lanyard, the Tractel elastic lanyards LSEA provide a much higher degree of resistance to ageing (the strap keeps its elasticity much longer) and has a much more attractive design.

LCM 03

Work positioning lanyards

EN358 - CNB/P/11.062

The work positioning lanyard LCM03 is a manually adjusted tensioner-reducer. This device works on a low-stretch rope with soul in steel diameter of 12.5 mm.

The LCM03 is compact and ergonomic and perfectly suited for work positioning.

The lanyard LCM03 is equipped with a compact, ergonomic tensioner-reducer. The device is made of high-strength aluminium. The tensioner-reducer LCM03 slide along the rope . In the event of a fall or loss of balance, the tensioner automatically locks.

The unit is supplied with rope with soul in steel diameter of 12.5 mm and length of 2m, 3m or 4m, equipped with a connector M10 on the tensioner and a connector M40 on the end of the rope

This lanyard is not a fall arrest.

LCM 05

Work positioning lanyard

Adjustable Lanyard - LCM05

EN358 - CNB/P/11.062

The work positioning lanyard LCM05 is a manually adjusted tensioner-reducer. This device works on a low-stretch braided rope in polyamide diameter of 12.5 mm.

The LCM05 is compact and ergonomic and perfectly suited for work positioning.

The LCM05 is equipped with a compact, ergonomic tensioner-reducer. The device is made of high-strength aluminium. The tensioner-reducer LCM05 slide along the rope. In the event of a fall or loss of balance, the tensioner automatically locks.

The unit is supplied with braided rope diameter of 12.5 mm and length of 2m, 3m or 4m, equipped with a connector M10 on the tensioner and a connector M40 on the end of the rope

This lanyard is not a fall arrest.

LSE - Elastic Webbing Lanyards

Restraint lanyards

EN354 - CNB/P/11.062

Strap elastic webbing lanyard 30 mm, without shock absorber.

The elastic lanyards LSE are lanyards formed by a strap made of rigid polyester fiber woven on an elastic fiber core.

This elastic fiber has elongation properties which allow the lanyard to stretch by one-third of its contracted length.

The outer strap made of polyester fibers woven on the elastic fiber core gives the elastic lanyards LSE excellent resistance to abrasion and cutting when it comes into contact with a sharp edge.

With respect to standard lanyards, the elastic lanyards LSE provide the advantage of being more compact and therefore more comfortable in use.

With respect to the elastic lanyards currently on the market, formed by a tubular strap with an elastic material inside the lanyard, the Tractel® elastic lanyards LSE provide a much higher degree of resistance to ageing (the strap keeps its elasticity much longer) and has a much more attractive design.

- EN354

Anchor points

Applicable standards : EN 795: An anchor point is a point to which the fall-arrest system can be attached reliably so as to guarantee the safety of the operator.

Before selecting an anchor point, it is essential to determine where it will be installed. The strength of the structure supporting the anchor point must be considered.

EN 795 Type A

Anchor devices which require one or more structural anchors to be secured.

- PAS
- PA anchor
- ringsafe
- PO

- ringflex
- Roof anchor
- Anchor posts

EN 795 Type B

Temporary and transportable anchor devices.

Anchors

Type A anchor: fixed anchors

Anchor - Ringflex

EN795-A - CEN/TS16415 for use by two people

The Ringflex anchor point is designed for installation on flexible roofs of corrugated tray (steel or aluminium), dry tray or rolled tray (top seal) types.

The Ringflex is installed by means of different anchor plates, specific to each type of roof.

Model	Product Code
Ringflex anchor ring single item	193858
Universal plate for extremity and intermediate bracket in galvanised steel (thickness 3mm)	207788
Universal plate for extremity and intermediate bracket in stainless steel (thickness 3mm)	206888
Kit 4 clamps + 1 bolt M16	232577
Kit 12 rivets + rubber sealing bands + 1 bolt M16	232587

2 users, 150 kg

NB : The ringflex is sold without an anchor plate.

*For using universal plate, you have to order 4 clamps or 12 rivets.

Characteristics of trays for use of universal plates:
Mini steel tray and sandwich panel thickness: 0.4 mm
Mini aluminum tray standing seam thickness: 1 mm
Waves: 200 to 350 mm

Anchors

Type A anchor: fixed anchors

2 users, 100 kg

Anchor - Ballsafe

EN795-B - CEN/TS16415 for use by two people

The ballsafe anchor point is made up of a four block plug and a female socket. It is sealed into concrete or a material of equal density using a chemical compound.

Dynaline - Dynaplug

Dynaline™ HF 45

Specific model, based on HF37 technology, adapted to measure precisely tension in lifelines.

- Quick direct mounting on the wire or rope thanks to modified fixing hooks
- Capacity range from 50 to 600 kg
- Specific lifeline wire rope database
- 3% accuracy of measuring range, if wire rope and diameter included in the database
- Compatible with diameters from 8 to 12 mm
- LCD display directly on the sensor
- Possibility to add a wire or rope in the database

Model	W.L.L	Rope Diameter	Product Code
Kit Dynaline HF45/1/LPT	50 - 600	8 - 12	187998

Dynaplug HF 44

The Dynaplug anchor tester is an electronic load cell designed to measure anchor strength in construction material. Its shape as a tripod has been especially designed to minimize its influence on the concrete around the fixing.

- Stand-alone anchor tester
- Capacity range from 1 500 to 5000 daN
- 0.5% accuracy of measuring range
- Height of legs adjustable between 70 and 190 mm
- Multiple accessories provided with the tester
- LCD display integrated on the device
- Data saving and possibility to monitor the tension on a PC in option

Model	W.L.L	Product Code
Kit Dynaplug HF44/1/LPT	1500	190028
Kit Dynaplug HF44/2/LPT	2500	190038
Kit Dynaplug HF44/3/LPT	5000	190048

Anchor Tester TA

Anchor testers TA are test specimens endowed with a breaking section calibrated to break under a determined traction force. The anchor tester must be installed between the anchor point to be tested and the loading device by means of shackles or any other adequate mechanical connection.

- Quick and reliable test
- Unique usage
- Capacity range from 600 to 4000 daN
- Breaking tolerance $\pm 10\%$

Model	Breaking load (daN)	Product Code

Anchor - corso

EN795-B

corso clamp beam clamp with adjustable threaded bar.

- Compact and strong construction.
- Fast and simple adjustment to section.

Model	Weight (kg)	Product Code
corso LT-1B Beam Clamp	4.380	97929

Anchors

Type B anchor: mobile anchors - (EN795)

Rollbeam

EN795-B

- Push trolley.
- Travels on lower iron footplate.

Model	Description	Weight (kg)	Product Code
rollbeam SB	Standard - adjustable from 58 - 220 mm	11,7	54369
rollbeam LB	Extra wide - adjustable from 220 - 300 mm	12,7	88559

1 user, 150 kg

Rollclamp

EN795-B

Enables the creation of a mobile anchor point on an R.S.J. and the ability to work safely while retaining a wide range of movement. Thanks to its 4 bearing rollers, the rollclamp follows movement around the framework with minimal user intervention.

- Medium adjustable: 90- 400 max.
- Large adjustable: 200 - 615 max.
- Can be installed on the upper or lower soleplate.
- rollclamp Weight: M 1.48 kg and L 2.04 kg.

Model	Weight (kg)	Product Code
medium	1.500	86009
large	2.080	86019

Mobifor

Deadweight anchoring system

EN795-E

The Mobifor is a revolutionary, deadweight anchoring system, for installation on flat roofs and fall risk areas. The set consists of 24, steel-reinforced, concrete blocks, positioned on four steel arms. The arms are connected at the centre by a joining plate equipped with a rotary anchor point with an energy dissipater.

SPECIFICATION

- 4 arms made of galvanised steel.
- 24 concrete weights.
- Rotary anchor point.
- Conforms to standard EN 795-E.

NO TOOLS REQUIRED

- The connecting plate is set up with no need to drill holes in the roof.
- The arms click easily into the plate.
- Weights automatically interlock.

EASY TO SET UP

- Takes less than 5 minutes to set up.
- The system uses ergonomic weights with large handles.
- Overall weight is distributed across 24 separate weights making it easy to lift and carry.
- The weights are easy to install on the arms.

ENHANCED FALL PROTECTION

- 360 degree movement possible thanks to the rotary anchor point.
- Compatible with a variety of fall arrest devices.

EXTREMELY VERSATILE

- Adapts to all horizontal roofs meeting European requirements.
- Its weight and volume allows for installation in places where traditional anchoring systems cannot be installed.
- Can be placed on a slope with an inclination of up to 5 degrees.
- Can be installed without penetrating the roof surface.
- Can be installed on the following roof surfaces: EPDM, bitumen, PVC.

1 user, 100 kg.

Confined access range

Davitrac

- Permanent anchor point (2 users of 150 kg each), compatible for working suspended on rope
- Lifting anchor point complying with machinery standards 2006/42/CE - WLL : 500 kg
- Permanent or semi-permanent installation
- Manual and motorised
- Several bases available

Davimast

- Permanent anchor point (2 users of 150 kg each)
- Lifting anchor point complying with machinery standards 2006/42/CE - WLL : 250 kg
- Permanent or semi-permanent installation
- Manual
- Compatible with davitrac bases

Tracpode

- Material and people lifting (compatible for work in suspension)
- 150 kg people / WLL 500 kg material
- Semi-permanent installation
- Rugged mobile solution
- Manual and motorised

Tracrod

- Permanent anchor point (150 kg)
- Semi-permanent installation
- Manual

FABA ladder

Davitrac

Made in France

The Davitrac is a complete solution for safe vertical lifting of person and material in confined spaces situation.

Mobile and efficient solution for rescue situations.

It offers protection and total mobility for two people simultaneously, during work involving risk of falling

Its compatibility with the Tractel tool range allows a large number of possible configurations.

Technical characteristics:

- Weight: 30 kg (without accessories & bases)
- Anchor points for fall arresters (2 users): 150kg each
- Maximum load capacity (materials): WLL 500 kg
- 360° rotating mast (with locking every 90°)

Standards:

- EN 795-B : 2012 (transportable anchor point)
- EN 1496
- Machine Directive 2006/42/CE (Material lifting).
- CEN/TS 16415:2013-B (Fall arrest for 2 users).
- Individual protection of operators against falls (EN 795 Class A and / or B + EN 360)

Compatibles applications:

- Rescue
- Confined spaces
- Rope works
- Manholes
- Pits
- Sewerod access
- Pipes
- Oil and gas
- Civil engineering
- Industry
- Wind and solar installation

Davitrac

Blocfor with bracket for Davitrac

Automatic fall arrester (**EN360**) with rope (galvanised or stainless steel), with integrated winch rescue (**EN1496**).

Can be easily integrated on the davitrac, without tools.

Allows to secure an operator up to 150 kg, equipped with his tools.

- Integrate winch : Automatic fall protection device with integrated winch for ascending or descending during a possible rescue operation.
- Shock-absorption system ESD : is also a fall indicator, eliminating the risk of using the device after a fall. It ensures that the user will not be subjected to an impact of more than 600 daN even if the fall occurs when the cable is fully unwound.
- The Blocfor cable is guided by equipped pulleys with an anti-jump cable fixed on the arrow of davitrac.

Made in France

EN795-B - Machine directive 2006/42/CE

Tracpode 150 kg is a temporary anchor point.

It is tested to stop the fall of two operators weighing 150 kg each; including the weight of their equipment and tools. It allows two users to work safely.

It may also be used as an anchor point for lifting with the ability to lift a maximum load of 500 kg.

It can be folded up and it is small enough to be transported in light "site vehicles". It is easy to handle.

The Tracpode 150 kg is intended for persons who need to access confined spaces such as storage silos, sewers, etc.

Derope with bracket for tracpode

EN341 - EN1496

Derope is a descent device (**EN341**) with recovery winch (**EN 1496**).

The Derope descent device is a controlled speed descent evacuation system.

Can be easily integrated on the tracpode, without tools. Thanks to its conception, it permits the installation of very long cables of more than 30m.

It can be used to evacuate either one person (up to 150 kg) at heights of up to 400 meters or 2 persons (up to 225 kg) at heights of up to 200 meters, if the operator is equipped with a fall arrester.

- The braided rope is guided by pulleys equipped with an anti-jump cable fixed on the head of Tracpode

Model	Product Code
Derope with bracket for tracpode	87498
Rope (1m)	50962

Made in France

Drill attachment

The UP range is equipped with a drill attachment for use with a battery operated drill of 14 V, 300 W.

The Derope UP descender can be used with a battery powered drill, opening up many more applications for the product.

- The drill attachment enables the fast lifting of a person over a great height in a rescue operation or vertical displacement. It is recommended for companies that work in silos, in tanker vats, in drains, etc.
- The Derope UP descender can be used to move rope access technicians and raise them, effortlessly, to a greater height. It is ideal for window cleaners, bill stickers and aerial installers.

Tracrod 150 kg

The Tracrod 150 kg anchor rod is a transportable anchor point which enables two operators, each weighing up to 150 kg operator + harness + tool, to work in safety.

To install it ready for use, the Tracrod 150 kg anchor rod is inserted into a stainless steel support mount which is secured in place permanently at the place of work.

The Tracrod anchor rod can be disassembled. Its compact dimensions and light weight means that it can be transported in small vehicles and is easy to handle.

tracrod 150 kg anchor rod is intended for persons who need to gain access via manholes to structures such as storage silos, sewers, etc.

The head of the Tracrod 150 kg anchor point is equipped with 2 anchors points.

As an option, it can be fitted with a bracket to support a Blocfor 20R or 30R

FABA System A12

Fall arresters on rail for sewerod access

The FABA A12 System has been on the market since 1995. It is a logical evolution of the FABA A11 System but a lighter and smaller version. The design of the safety rail and carriages is asymmetrical and guarantees that the carriages are always used in the right direction.

- Dimensions rail profile: 48 x 32 x 3 mm
- Material: Hot-dipped galvanised steel or stainless steel (1.4571)
- Design: Ladder with central upright or just rail
- Spacing in between stops: 40 mm
- Spacing in between rungs: 280 mm
- Rungs: Straight and welded on the back of the rail
- Width of the ladder: 380 mm
- Primary lengths: 5600 and 2800 mm
- Adjustment lengths: 560, 840, 1120, 1400, 1680, 1960, 2240, 2520, 3080, 3360, 3640, 3920, 4200, 4480, 4760, 5040 and 5320 mm
- Maximum distance between fixings: 1400 mm for the ladder and 1960 mm for the rail.

"Confined space" range

Harness HT55 Confined Space

EN 361

Made in France

The HT55 harness can be used for confined space. It is particularly suited for use with a respiratory system which slides easily onto the belt.

Enhanced comfort is ensured by the back XPad, the mountaineering-type thigh straps, and the linkage between the shoulder straps and thigh straps by connecting buckles.

The harness is very easy to slip on as it opens fully at the front with the X-Pad preserving the harness form.

- Universal and very comfortable harness, automatic with extra comfort for long periods of work
- 1 dorsal with a big forged D anchorage to eliminate the risk of carabiner disconnection
- 1 sternal anchorage
- 1 special belt for respiratory system
- 1 comfort sub-pelvic strap
- Sliders for strap adjustment. Cannot be removed for security reasons
- 3 adjustment points
- Independent mountain leg strap High-comfort
- X-pad comfort back pad: Breathable and flexible - it gives the harness shape to make it easier to put on.
- Fall indicator in each anchorage
- Label holder

Pro series

Harness HT22R

EN361 - EN1497

Universal harness with standard buckles and rescue straps.

The HT22R is a harness specifically designed to rescue an operator working in a confined space. It is equipped with an emergency strap attached to the shoulder straps. This strap allows the operator to be raised in a perfect vertical position which facilitates the exit of the body through the manhole.

- 1 dorsal anchor point.
- 1 sternal anchorage point in textile loop.
- 1 sub-pelvic strap.
- 5 adjustment loops.

	S	M	XL
HT22R - Standard buckles	44952	44962	44972

HT9 Evacuation triangle

EN1497

Special harness for evacuation operations, easy to install, even with a person lying on the ground.

Due to its 3 adjustment settings, the HT9 can be used with both children and adults.

- EN 1497.

Lifeline

Temporary lifelines

EN 795 B/C - 2012

Tempo 2 - Temporary Lifeline

EN795 - CEN/TS16415

Tempo 2 is a temporary lifeline, easy and quick to install when there are two anchoring points offering sufficient resistance (28 kN). Lightweight, it allows total freedom of horizontal movement. The Tempo 2 lifeline can be installed on the ridge tiling of a roof or onto a metal structure.

- Synthetic fibre webbing straps, adjustable from 5 to 20 m.
- Can be used by 2 people.
- 7 metres clearance.
- Supplied with 2 AS30S webbing strap rings, 2 MR9 connectors and a shoulder bag.

Model	Product Code
Tempo 2 kit	206018

Made in France

Tempo 3 - Braided Rope - Temporary Lifeline

EN795-B - CEN/TS16415

Tempo 3 is a compact, temporary lifeline, and is the fastest, most efficient lifeline available on the market.

Using a static rope, N.G.R reinforced, and a tensioning system, the tempo 3 allows for simultaneous use by 3 users. This lifeline offers the possibility of setting up a temporary lifeline with a maximum length of 18 metres between two anchor points of sufficient strength (15 kN).

- Static rope line, N.G.R reinforced, adjustable from 5 to 18 m.
- Supplied with two AS30S webbing strap rings, 2 M10 connectors and a shoulder bag.

Tirsafe Wire Rope Temporary Lifeline

EN795-B - CEN/TS16415

Tirsafe T3 is a temporary lifeline that is easy and quick to install when there are two anchoring points offering sufficient support (30 kN). It allows for total freedom of horizontal movement. Adjustable from 5 to 30 m.

The Tirsafe T3 temporary lifeline includes:

- 1 anchoring point with Tirsafe T3 energy shock-absorber.
- 1 tirfor T3 cable winch.
- 2 x 2 metre slings.
- The Tirsafe T3 temporary lifeline guarantees the safety of 3 people.

Tirsafe kit	with a 30m, 8.3 mm diameter cable	276149

Permanent lifelines

EN 795-C:2012, CEN/TS 16415:2013

Permanent lifelines are part of fall arrest systems when they are used as the anchor solutions. As an anchor solution, their certification is related to the norm EN 795 of 2012 for single user and CEN/TS 16415 of 2013 for multi users.

Permanent lifelines are designed to stop the fall of one (or more, as specified below) users and to absorb part of the energy transmitted to the supporting structure. When used as a part of a fall arrest system, the user must always wear a safety harness and a fall arrester with shock absorber limiting the impact of the fall to 600daN on his body.

Tractel offers a wide range of permanent lifelines including a rigid rail solution to suit best each application.

Travsafe

Twin cables lifeline

Tested to stop the fall of
3 users, 150kg

OR

5 users, 100kg

EN795-C - CEN/TS16415

The new Travsafe lifeline is an evolution of the previous version. It complies with the European norm EN795-C and the CEN/TS16415 for multi-user. The Travsafe lifeline with its two cables is the most efficient and sophisticated lifeline on the market.

As an extension of Tractel High Capacity Range, the Travsafe lifeline is now certified for user weighing up to 150kg including all their equipment.

This lifeline is certified for a simultaneous use for a maximum of 5 users 100kg or 3 users 150kg.

Tractel has performed compatibility tests for all of its self-retracting fall arrester (EN360) and guided type fall arresters (EN353-2) rated 150kg on the Travsafe lifeline. All lanyards certified EN 355 can be used with the Travsafe lifeline.

Thanks to its specific design, the slider easily moves past the intermediate cable brackets, with no need for any manual intervention.

Two versions are now available:

- Travsafe with stainless steel shock absorber rings
- Travsafe with two-material shock absorber ring

These two Travsafe lifeline versions are designed for overhead, on wall or ground installations. The anchors can be installed on any structure or by using post interfaces. Intermediate anchors must be positioned no more than 15 meters apart.

When configured in stainless steel (anchors, wire ropes and absorber rings), the Travsafe offers the possibility to have a distance between anchors from **0.8m to 30m** in both single span and multi spans configuration.

The Travsafe is particularly well suited for long applications (over 200m). On overhead application, the Rollsafe slider ensures a smooth gliding of any fall arrester (including heavy self-retracting block) on the twin system.

For more information please contact Tractel.

The Travsmart lifeline complies with the European norm EN795-C and the CEN/TS16415 for multi-user.

As an extension of Tractel High Capacity Range, the Travsmart lifeline is now certified for user weighing up to 150kg including all their equipment.

This lifeline is certified for a simultaneous use for a maximum of 5 users 100kg or 3 users 150kg.

Intermediate anchors must be positioned no more than 15 meters apart.

In single span configuration (without intermediate anchor), Tractel has certified the travsmart lifeline with a maximum distance between end anchors of **30m!**

Tractel has performed compatibility tests for all of its self-retracting fall arrester (EN360) and guided type fall arresters (EN353-2) rated 150kg on the Travsmart lifeline. All lanyards certified EN 355 can be used with the Travsmart lifeline.

Travsmart is the most polyvalent lifeline of Tractel' portfolio. The Travsmart lifeline is certified for the following installation: overhead, on a wall, on an inclined surface up to 15°, on the ground or on a post.

The Travsmart lifeline advantages:

MEETS THE USER'S NEEDS:

- Choices of installations and uses (ergonomics).
- Automatic anchor crossing thanks to the travsmart slider.
- The user can work on either side of the lifeline without the need to disconnect (improved safety).
- Wire rope available in galvanized steel or stainless steel.

MEETS THE INSTALLER'S NEEDS:

- No special tools are required for the installation of the lifeline.
- Thanks to the wedge socket, the risk of the cable clamp nuts coming loose over time is fully eliminated.
- Quick and easy installation of the lifeline thanks to the design of the intermediate anchor.
- In the event of a fall, there is no need to fully dismantle the lifeline. Simply loosen the cable to remove and reinstall the failed intermediate supports (installation time reduced).

For more information please contact Tractel.

Example:

I would like to install a travsmart lifeline with stainless steel cable for wall application, 45m.

I have to order :

- 1 kit travsmart stainless steel
- 1 start kit stainless steel
- 40 meters of stainless steel wire rope (start kit has already 5 m of wire rope)
- 2 travsmart end anchors for ground, wall and overhead
- 2 intermediate anchors
- 1 travsmart slider

Travflex 2

The new Travflex 2 lifeline is an evolution of the previous version. It complies with the European norm EN795-C and the CEN/TS16415 for multi-user.

As an extension of Tractel High Capacity Range, the Travflex 2 lifeline is now certified for user weighing up to 150kg including all their equipment.

This lifeline is certified for a simultaneous use for a maximum of 3 users 100kg or 2 users 150kg.

Intermediate anchors must be positioned no more than 15 meters apart.

Tractel has performed compatibility tests for all of its self-retracting fall arrester (EN360) and guided type fall arresters (EN353-2) rated 150kg on the Travflex 2 lifeline. All lanyards certified EN 355 can be used with the Travflex 2 lifeline.

Travflex 2 is the dedicated Tractel lifeline for light structure. Combined with the universal plate, it can be installed on a large range of light structures such as steel deck, sandwich panel and standing seam.

The Travflex 2 lifeline is certified for the following installation: on a wall, on an inclined surface up to 15° or on the ground.

The Travflex 2 lifeline advantages:

MEETS THE USER'S NEEDS:

- Choices of installations and uses (ergonomics).
- Automatic anchor crossing thanks to the travsmart slider.
- The user can work on either side of the lifeline without the need to disconnect (improved safety).
- Wire rope available in galvanized steel or stainless steel.

MEETS THE INSTALLER'S NEEDS:

- No special tools are required for the installation of the lifeline.
- Thanks to the wedge socket, the risk of the cable clamp nuts coming loose over time is fully eliminated.
- Quick and easy installation of the lifeline thanks to the design of the intermediate anchor.
- In the event of a fall, there is no need to fully dismantle the lifeline. Simply loosen the cable to remove and reinstall the failed intermediate supports (installation time reduced).

The kits Travflex 2 include two end anchors respectively in stainless steel or galvanized steel.

For more information please contact Tractel.

Travflex 2

Universal plate

Universal mounting plate for Travflex 2 on light structures

The universal plate is designed to be installed on light structures for our Travflex 2 lifeline and ringflex anchor point. There are two versions available, depending on the intended use:

- Plate for extremity & intermediate bracket or anchor point.
- Plate for curved bracket.

The plate can be mounted on a wide range of roofs:

- Metal sheet roofing.
- Sandwich panel.
- Aluminium standing seam.

Depending on the application, the plate is supplied with a set of 4 clamps or a set of 12 rivets.

Delivery

Every universal plate is supplied with the installation manual

Both the 4 clamp kit and the 12 rivet kit are delivered with 1x screw HM16, 2x M16 washers, 1x M16 locknut.

Travspring

Tested to stop the fall of
3 users, 150kg

OR

5 users, 100kg

The Travspring lifeline complies with the European norm EN795-C and the CEN/TS16415 for multi-user.

As an extension of Tractel High Capacity Range, the Travspring lifeline is now certified for user weighing up to 150kg including all their equipment.

This lifeline is certified for a simultaneous use for a maximum of 5 users 100kg or 3 users 150kg.

Intermediate anchors must be positioned no more than 15 meters apart.

In single span configuration (without intermediate anchor), Tractel has certified the Travspring lifeline with a maximum distance between end anchors of **30m!**

Tractel has performed compatibility tests for all of its self-retracting fall arrester (EN360) and guided type fall arresters (EN353-2) rated 150kg on the Travspring lifeline. All lanyards certified EN 355 can be used with the Travspring lifeline.

Travspring is a simple yet engineered solution. It is designed to be proximity lifeline as the intermediate anchor must be crossed manually.

The Travspring lifeline is certified for the following installation: on a wall, on an inclined surface up to 15°, on the ground or on a post. In addition, in a single span configuration, Travspring can be installed overhead.

Travspring lifeline can be equipped with 1 or 2 INRS absorbers depending the need of the project.

The Travspring lifeline advantages:

MEETS THE USER'S NEEDS:

- Proximity lifeline
- Choices of installations and uses (ergonomics).
- The user can work on either side of the lifeline without the need to disconnect (improved safety).
- Wire rope available in galvanized steel or stainless steel.

MEETS THE INSTALLER'S NEEDS:

- No special tools are required for the installation of the lifeline.
- Thanks to the wedge socket, the risk of the cable clamp nuts coming loose over time is fully eliminated.
- Quick and easy installation of the lifeline thanks to the design of the intermediate anchor.
- In the event of a fall, there is no need to fully dismantle the lifeline. Simply loosen the cable to remove and reinstall the failed intermediate supports (installation time reduced).

For more information please contact Tractel.

Travspring one

Tested to stop the fall of

3 users, 150kg

OR

5 users, 100kg

The new Travspring One lifeline is a derivative of the Travspring lifeline. It complies with the European norm EN792-C:2012 and the CEN/TS16415:2013 for multi-user.

It is designed as a simple and inexpensive lifeline for occasional use. The system requires a double lifeline to pass the intermediate supports and curves.

150kg High Capacity Range

As an extension of Tractel High Capacity Range, the Travspring One lifeline is now certified for user weighing up to 150kg including all their equipment. This lifeline is certified for a simultaneous use for a maximum of 5 users 100kg or 3 users 150kg. In order to comply with the 150 kg classification, the harness and connection (lifelines, automatic fall arrest devices or guided fall arresters with flexible anchor line) must all have a 150 kg classification.

Specifications

Intermediate anchors must be positioned no more than 15 meters apart. In single span configuration (without intermediate anchor), Tractel has certified the Travspring lifeline with a maximum distance between end anchors of 30 meter.

The Travspring lifeline is certified for the following installation: on a wall, on an inclined surface up to 15°, on the ground or on a post. In addition, in a single span configuration, travspring™ can be installed overhead.

The system is supplied with a visual tension indicator and an in-line energy absorber.

Tractel has performed compatibility tests for all of its self-retracting fall arrester (EN360) and guided type fall arresters (EN353-2) rated 150kg on the Travspring One lifeline. All lanyards certified EN 355 can be used with the Travspring One lifeline.

Benefits

- Thanks to the wedge socket, the risk of the cable clamp nuts coming loose over time is fully eliminated.
- No special tools are required for the installation of the lifeline.
- Few components to install.

Travrail

EN 795-D

Travrail is a horizontal rigid anchor rail. It is designed to protect workers in the event of a fall, during tasks such as cleaning or maintenance work, checking an installation or safely entering a structure. It allows the slider to move freely over the intermediate anchors, enabling the user to move easily from one side of the rail to the other.

The rail makes it possible to secure 3 people (each weighing up to 100 kg including equipment and tools) at the same time (one person per slider).

The rail can also be used as an anchor point for Rope Access work (wall and floor applications only). In this case, each user must always be equipped with 2 sliders:

- 1 for the work rope
- 1 for the safety rope

The maximum distance between brackets of the aluminium rail is 6m (3m for rope access applications). 90° bends available for wall mounting and floor/ceiling mounting. The rail can be mounted on the floor, on the wall or overhead.

Travrail features:

- Detachable end stop for inserting or retrieving sliders
- Complies with EN 795-D
- Complies with CEN/TS 16415 for 3 simultaneous users
- To be used with EN 360 retractable fall arresters
- To be used with EN 353-2 guided type fall arresters with flexible anchor line
- To be used with EN 355 energy absorbers and decelerators
- To be used with EN 361 full body harnesses

EN 353-1 - EN 353-2 - CNB/P/11.062

The use of a ladder to gain access to a high level workstation can pose an element of risk. The purpose of the Stopcable S system is to ensure the safety of personnel throughout their ascent. The Stopcable S vertical lifeline is a mobile anchoring device to enable a person to move on a vertical axis in perfect safety and without having to disconnect themselves. It consists of a fixed point and individual mobile equipment. The Stopcable S vertical lifeline was designed, created and tested to comply with the requirements of the EN353-1 and EN 353-2 standards.

Permanent safety ladders

FABA system

EN353-1

The FABA range is a fall arrest system on a rail for vertical movements. The vertical rails are separately available for mounting on an existing ladder or can be supplied with an integrated ladder. The FABA systems include accessories such as rest platforms or access blocking systems. They are built to be adapted to all types of supports. These products can be supplied in galvanized steel, stainless steel or aluminium.

FABA ladders are complete systems in which all components are aligned with each other. The rigid rail allows the user to better control the movement of the slider. Unlike cable systems, several people can climb up the ladder one after the other (with sufficient spacing). Ideal for use over long distances.

The products of the FABA range have been tested to meet the requirements of the European EN 353-1 standard. Areas of application: along towers, chimneys, tanks, bridge piers, masts, antenna supports, access to mines, pits, sludge lagoons, cat walks, dams, tank lorries, cranes, roof terraces, waste water systems, etc.

For more information please contact Tractel.

See our harnesses, especially dedicated and patented for being used with FABA ladders :

HT120

HT Easyclimb

FABA System AL2

The FABA AL2 System has been on the market since 2000. It is based on the principle of the FABA A12 System and is suitable for material in anodised aluminum. The design of the safety rail and sliders is asymmetrical and guarantees sliders are always used in the right direction.

- Dimensions rail profile (H-shaped): 48 x 65 x 3-6mm
- Material: Anodised aluminum
- Design: Ladder with a central upright or with additional side uprights or just rail
- Spacing in between stops: 70 mm
- Spacing in between rungs: 280 mm
- Rungs: Straight, inserted and set on the back of the rail
- Ladder width: 414 mm
- Primary lengths: 5600 and 2800 mm
- Adjustment lengths: 560, 840, 1120, 1400, 1680, 1960, 2240, 2520, 3080, 3360, 3640, 3920, 4200, 4480, 4760, 5040 and 5320 mm
- Maximum distance between fixings: 1680 mm for the ladder with central upright, 2520 mm suitable for ladder with side uprights or the rail.

For more information please contact Tractel® .

FABA System A12

The FABA A12 System has been on the market since 1995. It is a logical evolution of the FABA A11 System but a lighter and smaller version. The design of the safety rail and carriages is asymmetrical and guarantees that the carriages are always used in the right direction.

- Dimensions rail profile: 48 x 32 x 3 mm
- Material: Hot-dipped galvanised steel or stainless steel (1.4571)
- Design: Ladder with central upright or just rail
- Spacing in between stops: 40 mm
- Spacing in between rungs: 280 mm
- Rungs: Straight and welded on the back of the rail
- Width of the ladder: 380 mm
- Primary lengths: 5600 and 2800 mm
- Adjustment lengths: 560, 840, 1120, 1400, 1680, 1960, 2240, 2520, 3080, 3360, 3640, 3920, 4200, 4480, 4760, 5040 and 5320 mm
- Maximum distance between fixings: 1400 mm for the ladder and 1960 mm for the rail.

FABA A12 & AL2

Sliders

The slider is mobile component of the FABA system and is attached to the user with a carabiner. All FABA sliders are certified to the latest applicable standard (EN353-1) and comply with the European Regulation 2016/425 (PPE Regulation) with a maximum user weight of 150kg.

The following sliders are compatible with the FABA system A12 and AL2:

- AL-D
- Grip
- EZ

Each slider is designed for different uses according to the user needs and the following table is aimed at guiding the user's choice.

The safety rail of FABA is C-shaped rail and the sliders are gliding inside the rail. This offers the advantage of compacity of the system and increase the comfort of use as the rail and slider take less place in front of the user.

	AL-D	Grip	EZ

EZ

FABA EZ 150kg

FABA EZ, simply said "easy"

- The biggest advantage and differentiator of this slider is its possibility to be inserted and retrieved at any place of a rail or a ladder,
- Thanks to its unique design, you insert or retrieve it with only one hand,
- Developed and compatible with FABA A12 & AL2,
- Introduction is only possible in the correct direction thanks to asymmetric profile,
- Robust and self mechanical locking system,
- Inside sliding,
- Good gliding,
- Available with manual (M10) or trilock connector (M23),
- User up to 150kg

FABA™ EZ 150kg M10	513888

FABA AL-D 150kg

The slider FABA AL-D 150kg is conform to the latest applicable standard EN 353-1 and to the European Regulation 2016/425 and is certified for a user weighing up to 150kg.

The slider is certified and compatible with the rail and ladder of FABA A12 galvanized steel or stainless steel and the rail and ladder of FABA AL2 and its related products, the FABA AL2 Mobil and the FABA AL2 Mobil-F.

This rigid vertical fall arrester is tested to stop the fall of one operator, with its tools and equipment, weighing up to 150 kg. It enables several operators to work in safety (each operator having his own FABA AL-D slider) if there are no more than two operators within 10m and at least 3m between them.

In order to provide protection for the user up to the maximum allowed weight, all the products of the system must be HIGH CAPACITY RANGE 150 KG (Attention: the weakest element in the chain always determines the maximum capacity of the entire system).

Model	Product Code
FABA AL-D - M10	514008
FABA™ AL-D - M23	514018

FABA Grip 150kg

The slider FABA Grip 150kg is conform to the latest applicable standard EN 353-1 and to the European Regulation 2016/425 and is certified for a user weighing up to 150kg.

The slider is certified and compatible with the rail and ladder of FABA A12 galvanized steel or stainless steel and the rail and ladder of FABA AL2 and its related products, the FABA AL2 Mobil and the FABA AL2 Mobil-F.

This rigid vertical fall arrester is tested to stop the fall of one operator, with its tools and equipment, weighing up to 150 kg. It enables several operators to work in safety (each operator having his own FABA Grip slider) if there are no more than two operators within 10m and at least 3m between them.

In order to provide protection for the user up to the maximum allowed weight, all the products of the system must be HIGH CAPACITY RANGE 150 KG (Attention: the weakest element in the chain always determines the maximum capacity of the entire system).

Temporary safety ladders

FABA System AL2 MOBIL

The FABA AL2 Mobil system

Safety ladder for temporary use on various structure types. The fasteners that accommodate the ladder are permanently fixed. In the standard version, wall and post clamp brackets are supplied for the posts.

Features FABA AL2 Mobil:

- Dimensions rail profil (H-shaped): 48 x 65 x 3-6mm
- Material: Anodised aluminum
- Design: Ladder with a central upright or with additional side upright
- Spacing in between stops: 70 mm
- Spacing in between rungs: 280 mm
- Rungs: Straight, inserted and set on the back of the rail
- Ladder width: 414 mm

Delivery Tractel:

- Supplied in managable lengths of: 2800, 2520, 2240, 1960 and 1680 mm

FABA System AL2 MOBIL-F

The FABA AL2 MOBIL-F system

Designed for access to posts or masts with a circular cross-section. The fasteners are pre-installed on the ladder sections and provided with fastening straps to enable the ladder sections to be tightened and positioned directly on the post or mast.

Features FABA AL2 MOBIL-F:

- Dimensions rail profil (H-shaped): 48 x 65 x 3-6mm
- Material: Anodised aluminum
- Design: Ladder with a central upright or with additional side upright
- Spacing in between stops: 70 mm
- Spacing in between rungs: 280 mm
- Rungs: Straight, inserted and set on the back of the rail
- Ladder width: 414 mm

Delivery Tractel:

- Supplied in managable lengths of: 1960 and 1680 mm
- Maximum distance between fixings: 1680 mm
- Characteristics of connectors: Automatic release of the upper end stops when fitting the next Ladder section.

FABA System A11

Introduced in 1965, the FABA A11 System is the precursor to the vertical access safety devices. The safety rail and slider designs are symmetrical. The slider can be inserted in either direction in the safety rail.

- Rail profile dimension: 68 x 56 x 2.8mm
- Material: Hot-dipped galvanised steel or stainless steel (1.4571)
- 3 versions of the FABA A11 exist:
 - Ladder with central rail,
 - Ladder with side bars,
 - Central rail or just a rail.
- Distance catching stops: 140 mm
- Distance between rungs: 280 mm
- Rungs: Inclined forward and welded on the back of the rail.
- Ladder width: 408 mm
- Primary Length: 2800 mm
- Maximum distance between fixings: 1960 mm

FABA A11 is particularly well suited for installation on round manhole. The bent rungs (20°) help to reduce the required space for the installation of the ladder and offer more place to the user.

On request, customer made solution can be designed to fit perfectly to the installation site.

For more information please contact Tractel.

FABA Klassik 150kg

FABA System A11

We are introducing the new slider FABA Klassik 150kg. It is an upgrade to the actual FABA Klassik. This new version conforms to the latest applicable standard EN 353-1 and to the European Regulation 2016/425 and is certified for a user weighing up to 150kg.

This slider is a part of the process of upgrading our range of PPE fall protection products and an extension of the FABA range.

The slider is certified and compatible with the rail and ladder of FABA A11 galvanized steel or stainless steel its related accessories.

This rigid vertical fall arrester is tested to stop the fall of one operator, with its tools and equipment, weighing up to 150 kg. It enables several operators to work in safety (each operator having his own FABA Klassik slider) if there are no more than two operators within 10m and at least 3m between them.

In order to provide protection for the user up to the maximum allowed weight, all the products of the system must be HIGH CAPACITY RANGE 150 KG (Attention: the weakest element in the chain always determines the maximum capacity of the entire system).

Tractelift

The Tractelift is a climb assist system that relieves the weight of single or multiple climbers while ascending and descending the wind turbine ladder. The Tractelift gives traction relief in an adjustable pulling force up to 90 lbs (40 kg).

The Tractelift is easy to install, offers a continuous run rope loop and can fit onto virtually any kind of vertical ladder. With an adjustable clutch allowing the user to choose their own pulling force, this feature gives the Tractelift more advantages over the competition. The Tractelift can be fitted with a fixed or detachable motor, depending on the user's preference.

THE Tractelift IS NOT FALL ARRESTER EQUIPMENT.

Subito, Evak

Subito

Manual one man seat.

- With its easy, efficient and safe operation, the subito was created specifically for working on façades (inspection, maintenance and cleaning).
- Designed for working at heights of up to 30 metres.
- When equipped with a scafor™ manual winch it is approved for lifting people.

Drill attachment

The UP range is equipped with a drill attachment for use with a battery operated drill of 14 V, 300 W.

The Derope UP descender can be used with a battery powered drill, opening up many more applications for the product.

- The drill attachment enables the fast lifting of a person over a great height in a rescue operation or vertical displacement. It is recommended for companies that work in silos, in tanker vats, in drains, etc.
- The Derope UP descender can be used to move rope access technicians and raise them, effortlessly, to a greater height. It is ideal for window cleaners, bill stickers and aerial installers.

Derope

A complete kit for evacuation at height

Made in France

EN341 - EN1496

A complete kit for evacuation at heights.

Contents of the rescue kit:

- derope UP A for upwards and downwards evacuation
- 10.5 mm braided rope with a length of 85, 120 or 150 m and 3 M48 tri-lock karabiners
- 1 patented Tractel rope reel
- 1 braided rope protector
- 1 lanyard spreader device with connector to keep the rope from the structure
- 1 stopfor K to disconnect the fall arrest lanyard from the user
- 2 strap rings to connect the derope and the pulley onto the structure
- 1 pulley to position the braided rope in the optimal position during descent
- 4 M23 tri-lock connectors
- 1 waterproof box with shock absorbing foam

Advantages:

- Complete with derope UP A for fast and safe evacuation
- Complete equipment ready to use
- Strong and waterproof box
- Overpressure valve to protect against condensation
- Humidity indicator
- Humidity absorption bags
- Storage box seal lets you know if the kit has been opened
- If the seal is unbroken, the kit doesn't require inspection for 5 years

Specification:

- Dimensions (H x L x D): 225 mm x 200 mm x 165 mm
- Max load recovery: 150 kg (400 m) or 225 kg (200 m)
- Descent speed: 0.5 m/s - 2 m/s

Collective protection

Guard Trac guardrail system

Guard Trac, the collective protection by Tractel is offering more configurations to meet a wide range of application. From the very robust Guard Trac plus version to Guard Trac WPS with the smallest footprint. Here is a look at the different versions Tractel can offer:

- Guard Trac plus
- Guard Trac (with or without toe-board, with or without adjustable barriers)
- Guard Trac WP & WPS

Our Guard Trac guardrail systems have a completely unique design, offering a simple and fast way to secure your roof, without jeopardising your waterproofing. Thanks to the patented design of our bracket and the integrated design, the entire system can be installed without a single tool.

The short bracket of the guard trac range reduces the footprint of the guardrail offering two significant advantage: the trip hazard risk is reduced and more space is available for the installation of other equipments inside the secured area (such as solar panels).

Guard Trac™ is perfectly suited and certified for use in a variety of applications:

- Solar panels
- Roof replacements / repair
- HVAC replacement and repair
- Rail car platforms
- Ramps
- Construction sites
- Dig sites
- Mezzanines
- Assembly and break areas
- Hoist areas

Guard Trac™ a simple and fast way to secure your rooftop:

SAFETY ON JOBSITE:

- Short counter-weight support
- Trip hazard reduced
- Limited number of components
- Lightweight components
- Any angle between 30° - 330°

INSTALLATION:

- Tool free
- Quick (30% faster than comparable solutions)
- Easy installation and customisable on site.

Guard Trac guardrail

Guard Trac

EN 13374-A:2019

Guard Trac benefits and features:

- No risk of water penetration as no drilling is required for the installation.
- Thanks to our unique design, the installation is completely tool free.
- **Toe board option - when a parapet is not present**
- Fast Installation: 1 meter per minute.
- Compact footprint - ideal for installations with limited space
- Lightweight design
- The Guard Trac™ system can be installed on flat and inclined surfaces.
- The brackets are supplied in red. (other colours are available upon request.)
- The barriers are available in the lengths: 1.5 - 2 - 2.5 and 3 meters.
- The barriers are delivered in a natural aluminium finish (other colours are also available upon request.)
- The Guard Trac™ conforms and is certified according to **EN 13374-A:2019**.
- The inclination is limited to 10°.

COMPLETE RANGE:

- Range of standard barriers (1.5 - 2 - 2.5 and 3 m)
- Toe-board option
- Adjustable barrier & gate
- Easy stock management
- No additional components required

Guard Trac guardrail

Guard Trac WP & WPS

EN 13374-A:2019

The **WP & WPS** versions: an extension of our **Guard Trac** range EN 13374-A:2019.

A lot of roofs are built with an integrate parapet. Therefore, we decided to evolve our Guard Trac solution and use these existing parapets.

The parapet ensures that the Guard Trac system installed on the roof stay in place and can't slip toward the outside of the roof.

Using the parapet as part of the Guard Trac system help to simplify the system.

- Guard Trac **WP** = Guard Trac With Parapet
- Guard Trac **WPS** = Guard Trac With Parapet & Short arm.

Thanks to this evolution, the angle between 2 barriers is now completely flexible and can be adapted on site to any angle of the building where the system is installed.

The **WPS** offers a **very narrow solution**: it takes only **0.52m** from the parapet to the back of the counterweight.

These versions require the presence of a parapet with a minimum height of 150mm as they will be in contact with the parapet.

Model	Weight (kg)	Product Code

Guard Trac guardrail

Guard Trac Plus

EN 13374-A:2019 & EN ISO14122-3:2016

The Guard Trac Plus version conforms and is certified to **EN 13374-A:2019 and the EN ISO 14122-3:2016.**

Its the strongest version of our Guard Trac range, thanks to the additional counterweight and welded clamp.

The deformation, when the system is loaded, is the smallest of our Guard Trac range.

This makes Guard Trac Plus the most suitable solution of our guardrail system in difficult environment.

The Guard Trac Plus system can be installed on flat and inclined surfaces. The inclination is limited to 10°.

Tractel® is one of the first manufacturer to certify and put on the market guardrails according to the standard EN ISO 14122-3 version 2016. In this new version, only 2 additional criteria were added, but their impact on the design are important.

Model	Weight (kg)	Product Code

GENERAL CONDITIONS OF SALE AND SERVICE

GENERAL CONDITIONS OF SALE AND SERVICE v. 02.2020

1 – DRAWING UP OF THE AGREEMENT

Any order implies from the buyer, the acknowledgement by the buyer that he gets all required information to the conclusion of the agreement and the acceptance of the present terms. Therefore, no clause to the contrary may be set up against the seller if he has not formally accepted it in writing and notably all the general terms sent earlier by way of circular letters.

Unless otherwise specified, seller's quotation shall expire thirty (30) days from its date.

The sale agreement is perfect only after written acceptance by the seller of the buyer's order, or if not by the delivery.

An order which is accepted cannot be cancelled without the seller's prior and express consent.

2 – SPECIFICATIONS CONCERNING THE SUPPLY

The specifications mentioned in the seller's catalogues, price lists, leaflets and all advertising documents are for information purposes only. The seller reserves the right to carry out all changes he may consider appropriate on his models, even after acceptance of the orders, without, however, the essential specifications and performance being affected.

3 - PRICES Prices are understood in Euros free of any discount, taxes, or insurance for non packaged goods, ex-works (EXW Incoterms® ICC in force at the date when the contract is made).

Any possible costs for packaging, loading and conveying from the factory to the place of delivery shall be born by the buyer, unless otherwise agreed in writing.

4 - PAYMENT Save exception specified in the special terms appearing on the front page, the price is payable at the seller's head office as follows:

* part with the order (down payment)

* the balance by accepted draft 30 days from the date of invoicing.

The payment of the down payment with the order does not in any way entitle the buyer to retract in return for giving up his down payment which, in the event of cancellation of the order, remains acquired to the seller as a compensation, subject to all other rights.

5 - SETTLEMENT

5.1 – The non-payment entails the event of default and causes that all debts even not outstanding ones are immediately due.

5.2 – Penalties for delay and compensation for recovery costs

In the event the special terms specify a deferred payment and that one of the due dates is not observed, the buyer by right and without a prior formal demand, shall lay open to penalties for delay which will be the result of the application of a rate equal to three times the rate of French legal interest.

In addition to penalties for delay, and due to late payment, the buyer, de jure and without prior formal demand, shall pay recovery costs equal to 40 euros. The seller will be entitled to obtain compensation from the buyer for any recovery costs exceeding that fixed sum and incurred due to the buyer's late payment.

5.3 - Penalty clause

By express agreement, the non payment on the due date shall entail, as a penalty clause, a compensation of 15% of the amounts due, plus the interest set in the agreement and any possible costs of litigation.

5.4 – Retention of title and risk of loss

The products, subject-matter of the present order, shall remain by formal agreement the seller's property until full payment of the agreed price, and all means of payment: cheques, drafts or other negotiable instruments shall be considered as payment only after the actual collection of their amount by the seller.

During the period between the delivery and the full payment of the price, the buyer, by formal agreement, shall only be considered as the simple depository of the products, the buyer shall have to pay the price on agreed due dates, or failing payment of a single payment, to pay the full price or, to return the products, or if not he shall incur the penalties provided for by the law.

As an exception to article 1196 of the French Code of Civil Law, the delivery itself shall place the products at the buyer's risks despite the fact the latter is only the depository until full payment is made.

On account of his capacity of simple depository until the full payment of the price, the buyer to whom the products are delivered will not be entitled to resell them or to alienate them by any mean, including by way of contract of pledge, security or otherwise.

However, he may:

- Either, after prior agreement of the seller and under its entire liability, have its buyer pay directly the product subject-matter of the present agreement to the seller.

- Or assign the benefit and the charges resulting from the present agreement, but on the formal condition of informing its assignee under its own liability that the products are subject to a reservation of title clause and that himself is only the depository until full payment of their price, in such a manner that said assignee has himself only the capacity of depository until the payment, and that the seller may be able to claim from him the payment or the return, if the amount of the price is not paid in whole on the date due.

GENERAL CONDITIONS OF SALE AND SERVICE

TRACTEL SAS GENERAL CONDITIONS OF SALE AND SERVICE v. 02.2020

6 – DELIVERY TIME & DELIVERY

6.1 – Delivery means the placing at disposal of the product on the site notified by the seller.

6.2 – The delivery time is the date entered by the seller on its acknowledgment of receipt of the order.

6.3 – Delivery times are given for information purposes and without commitment. The seller commits to deliver promptly the goods to the buyer provided that the seller gets all the information and documents required for the performance of the contract.

6.4 – It is expressly agreed that the seller shall owe no compensation for delay, except in the event of deliberate tortious intent.

6.5 - a) The buyer shall take delivery of its product(s) in the seller's premises within 30 days following the notification of the seller that the product(s) are ready for delivery.

b) At the end of this 30-day period, and after a formal demand by registered letter with advice of delivery sent to the buyer to remove the product(s) IMMEDIATELY, the seller shall be entitled to force the buyer to perform its obligations, notably to make the payments, the delivery being considered as made; in this case the seller shall store the products at the buyer's risks.

c) After the time-limit provided for in article b), the seller shall be able, if it deems this appropriate, to consider the agreement as terminated by the buyer, the payments received from the latter being acquired to him without prejudice of any other rights, and notably the seller shall be entitled to demand as a penalty clause the payment of a compensation equal to 15% of the sale price of the equipment. The seller shall then, after advising the buyer by registered letter, use the products as it wishes.

d) The products are delivered with their instructions manual for use; the user shall read them before using the products. The buyer shall check and see if he has the documents, if not it shall contact the seller to get them.

e) Acceptance: Without any written claims within 30 days following the date of delivery, the product shall be considered as without any visible defects and accepted.

7 – TRANSPORT AND INSURANCE

The steps the seller may be led to take in the interest and on behalf of the buyer as regards insurance, transport, do not prevail against the principle of the delivery in the factory or store of the seller.

The fact of possibly including the transport cost in the price does not constitute an exemption to the principle of the delivery made in the factory or the store of the seller. Any transport made by the seller itself, whether the costs are to be paid for by the buyer or not, is considered as made according to a contract of carriage separate from the sale agreement.

If there are no instructions, the seller dispatches the goods in the best interests of the buyer.

In all cases, it is up to the buyer to check everything, to make all reservations upon the arrival of the product and to lodge, if the need arises, against the carrier the appeals, which must be lodged within 3 days following the acceptance, provided for by articles L133-1 and L133-3 of the French commercial Code; should these formalities not be complied with, the carrier's liability may not be implemented and the seller cannot in any case be sued for this reason.

8 - WARRANTY

Term and extent of the Warranty

8.1 – All products are covered against defects in material and construction faults for a period of twelve (12) months from the date appearing on the delivery slip.

8.2 – (i) This warranty is strictly limited, after examination of the product by the seller and to suit its convenience, to the repair or replacement of the product recognized as defective, with the express exclusion of all accessory costs. (ii) Are only covered by the warranty the cost of replaced parts and labour used. Travel costs and hotel expenses for the personnel on the user's site as well as transport costs of the product concerned at the seller's factory and return are to be paid for by the beneficiary of the warranty.

8.3 – The warranty does not cover the damage resulting from bad assembly, insufficient maintenance, or normal wear. It does not apply to paints and coatings.

8.4 – Any defect bringing into play the seller's warranty must, failing forfeiture, be declared to the seller, with the invoice corresponding to the purchase of the product in question and all supporting documents.

8.5 – Exchanges or repairing of parts covered by the warranty cannot extend the warranty.

8.6 – The warranty will be removed from any product which is modified, altered, repaired outside the seller's workshops without the seller's prior written approval.

8.7- The seller's liability is expressly limited to the above-mentioned warranty.

8.8 – An action to enforce the warranty cannot justify any delay in payments.

9 – LIABILITY

Under no circumstances, shall the seller be held to indemnify the consequential direct or indirect damage or contingent damage, notably any operating losses, loss of profits or loss of earnings. The liability of the seller, all causes taken into account with the exception of bodily injuries and gross negligence, is limited to a sum with an upper limit fixed at the amount invoiced and collected of the supply alleged defective.

The buyer is responsible for the waiver in contract against the seller or its insurers beyond the limits and exclusions fixed above.

GENERAL CONDITIONS OF SALE AND SERVICE

TRACTEL SAS GENERAL CONDITIONS OF SALE AND SERVICE v. 02.2020

10 – SERVICE PERFORMANCE

The scale of service performance of the seller is understood exclusive of travel and hotel costs. The estimates for repairs of the seller not followed by an order are payable and include the operations of dismantling, reassembly and trips. Without a reply from the buyer within 30 days from the date appearing on the estimate, the equipment shall be returned as such, transport costs to be paid for by the buyer.

The customer agrees to place at the disposal of the seller a place required for the operation as well as the required means of lifting, handling and trial.

The seller reserves the right to take into account the weather conditions on the site and accept no responsibility for any possible delays due to these conditions or to the non conformity of the site with the public health and safety conditions. Under no circumstance will the seller's liability be sought for the consequences of equipment which stops operating while it intervenes.

The customer must make sure of the solidity of supports, anchoring or props of the equipment set up; it has the responsibility of checking the solidity and the conformity with safety rules.

11 – FORCE MAJEURE

The Parties shall not be held responsible for any delay or failure to execute one of its obligations within the scope of the contract should the delay or failure be the direct or indirect result of a case of force majeure, which is defined as an event beyond the control of the Parties and independent from their will, including but not limited to cyber-attack, civil conflict, revolution, war, acts of God, occurrence of a natural catastrophe and extraordinary weather.

Should the event of Force Majeure last for more than 1 (one) month since its date of notice, then the party suffering from Force Majeure shall be entitled to terminate immediately the present Contract without prejudice by registered letter.

12 - HARDSHIP CLAUSE

The Parties are aware of the fact that this contract is fair and equitable. By mutual agreement, the Parties waive the article 1195 of the French Civil Code and accept to deal with risks associated with changing circumstances.

13 – PERSONAL DATA PROTECTION

The seller processes personal data (full name, address, email, phone number,...) of its buyer's contacts.

The purpose of personal data processing is to perform orders and manage the relationship between the seller and the buyer. These personal data may be shared with companies located within the EU: the other TRACTEL companies, Credit-Insurance companies, Business Element and Microsoft.

No transfer of personal data to third countries (outside European Union) or international organisations is intended.

The buyer undertakes to inform the seller of any update regarding the personal data of the data subject and to inform them of the content of this clause. The data subject benefits from the right to require access to, rectification, erasure of their personal data or restriction to processing of their personal data or to object to processing as well as the right to data portability by writing to rgpd.tsas@tractel.com

The data subject also has the right to lodge a complaint with the CNIL.

The seller undertakes to take appropriate technical measures in order to ensure security and confidentiality of personal data. The seller undertakes to keep personal data no longer than necessary for the purposes of this personal data processing and in any case for a maximum period of 3 years from the last products order to the seller.

14 – PUBLICITY

The seller and/or any other TRACTEL company will be authorised to issue marketing material, publicity, promotion or advertising in whatever form, regarding the goods and services object of the Order; this authorization may be suspended further to the buyer's request.

15 – JURISDICTION

By formal agreement, any disputes or difficulties relating to the construction or to the performance of the present order shall be under the JURISDICTION of the COMMERCIAL COURT of TROYES (10 – France). The present terms are governed by French law excluding the United Nations Convention on Contracts for the International Sale of Goods (Vienne, 1980).
